Monday

- Body Analysis: please use your Coach Robb Report Card to log this information for evaluation purposes
- Complete Rest Day

Misc. Notes: the key to successful training is eliminating the various distractions that get in your way. The best way to minimize the rippling effect of distractions is to plan ahead. Think about how stressful it is when you are running around short on time or can't find your calories or fluids for a particular workout. The same thing applies to clean eating, the main reason why athletes fall off clean eating is the proverbial "I don't have time to cook". Plan and designate some time to prep what you have purchased so that you can literally grab and go with high quality, low glycemic food, and snack items. Having fresh bottles of filtered water readily available is instrumental in your overall hydration program.

Evening Protocols

Flexibility: take 10 minutes and focus on your legs and lower body - <u>click here for a complete video list</u> **Nutrition:** consume 8-10 ounces of cold/filtered water; consume a raw snack and meal.

Tuesday

- Body Analysis: please use your Coach Robb Report Card to log this information for evaluation purposes
- (Morning Workout) Complete Racing Solutions Functional Strength Weight Workout

[Please use the spreadsheet and associated videos listed at the bottom of this document]

Workout Notes: these exercises are combined so that you hit all the muscles as a functional unit – the foundation for movement. Because you are using more than one muscle for each exercise, you may find yourself becoming fatigued quickly. Breathe deep and consistently throughout the exercise to maintain optimum performance. Consistently consume your Energy Fuel to maintain proper blood sugar levels and power output.

Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces of <u>Energy Fuel</u> to top off both your calories and provide you the much-needed electrolytes

Speed of Lift: Explode off the bottom Sets: 2 (unless it is a timed duration) **Repetitions:** 6-8 Reps (both upper & lower body)

Rest Interval: none in between exercises; 1 minute in between cycles

- Flexibility: complete an entire stretch routine for your hips, hamstrings, quads and calves
- **Nutrition:** immediately consume <u>Recovery Fuel</u> to shorten your recovery window and replace depleted muscle sugar (making tomorrows workouts more productive).
- Evening Protocols: please reference Monday's notes & video links

With your focus being on producing the fastest laps possible, your sight lap needs to be focused and productive. Have fluids and calories (exactly what you want to consume on race day) available to maintain your blood sugar levels (to maintain mental clarity and energy) throughout the entire workout.
