Monday

- **Body Analysis:** please use your Coach Robb Report Card to log this information for evaluation purposes
- **Complete Rest Day**
Misc. Notes: If possible, sleep in and begin your day with a dense breakfast consisting of fresh fruits and clean proteins (a vegetable omelet would be ideal) and 20 ounces of filtered, cold fluids (for maximum absorption). Keep a close eye on your food & fluid intake; the leaner you are the more sensitive you are to blood sugar levels. By utilizing your Coach Robb Food & Performance Log and evaluating the quality of your workout & post workout soreness will provide you immediate feedback regarding your quality and quantity of food you are taking in daily. When you begin to realize that each meal and snack is designed to “fuel” your next workout, you will begin to focus on how much you eat along with the quality and then evaluate if what you consumed improved or detracted from your performance. This constant evaluation will help you develop your nutritional profile as it relates to your health and ultimately your performance.
- **Evening Protocols**
Flexibility: after your shower, grab a tennis, lacrosse or TP ball and work any trigger points in your chest & gluts
Nutrition: 15 minutes before bed, take your evening supplements with your whey protein smoothie

Tuesday

- **Body Analysis:** please use your Coach Robb Report Card to log this information for evaluation purposes
- **(Morning Workout) Functional Strength Weight Workout**
[Please use the spreadsheet and associated videos listed at the bottom of this document]
Workout Notes: these exercises are combined so that you hit all the muscles as a functional unit – the foundation for movement. Because you are using more than one muscle for each exercise, you may find yourself becoming fatigued quickly. Breathe deep and consistently throughout the exercise to maintain optimum performance. Consistently consume your Energy Fuel to maintain proper blood sugar levels and power output.
Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces of [Energy Fuel](#) to top off both your calories and provide electrolytes for proper muscle contraction.
Speed of Lift: **Explode off the bottom** **Repetitions:** 6-8 Reps (both upper & lower body)
Sets: 2 (unless it is a timed duration) **Rest Interval:** none in between exercises; 1 minute in between cycles
Post Workout Protocols
 - **Flexibility:** complete [dynamic movements](#), [static stretches](#) & foam rolling exercises for optimum recovery
 - **Nutrition:** immediately consume 8-10 ounces of [Recovery Fuel](#) to replace depleted muscle sugar & repair muscle tissue
- **Evening Protocols:** please reference Monday's notes & video links

- **(Morning Workout) Complete Racing Solutions (CRS) MX: Aerobic Workout #1**

[Please refer to the spreadsheet at the bottom of this document]

Workout Notes: the emphasis for this workout is to lower your overall effort (based exclusively on your heart rate) and learn how to ride smooth, yet efficiently fast. It doesn't take a lot for you to "push the pace"; however, it will take patience and mental focus to find a comfortable speed with a lower overall heart rate. By following the indicated intensity levels, you will learn that you can become faster by lowering your effort down thanks to the momentum you will create. Remember, stay focused and Ride Smart Not Hard!

Post Workout Protocols

- **Flexibility:** complete [dynamic movements](#), [static stretches](#) & foam rolling exercises for optimum recovery
- **Nutrition:** immediately consume 8-10 ounces of [Recovery Fuel](#) to replace depleted muscle sugar & repair muscle tissue

2 Hour Power Nap after lunch

Misc. Notes: prior to your nap, consume a meal that is high in MCT's (medium chain triglycerides) - extra virgin olive oil, avocados, raw coconut, raw nuts and cold water fish (salmon). This quality fat will be used to recharge your body from the inside out while satisfying your appetite so that you can sleep soundly for 2-3 hours. When you wake up, consume 8-10 ounces of cold water and 2 scoops of Energy Fuel.

- **(Afternoon Workout) Functional Strength Weight Workout**

[Please use the spreadsheet and associated videos listed at the bottom of this document]

Workout Notes: these exercises are combined so that you hit all the muscles as a functional unit – the foundation for movement. Because you are using more than one muscle for each exercise, you may find yourself becoming fatigued quickly. Breathe deep and consistently throughout the exercise to maintain optimum performance. Consistently consume your Energy Fuel to maintain proper blood sugar levels and power output.

Sunday

- **Body Analysis** – please use your Coach Robb Report Card to log this information for evaluation purposes
- **(Morning Workout) Complete Racing Solutions (CRS) MX: Speed Workout #1**

[Please refer to the spreadsheet at the bottom of this document]

Workout Notes: pay extra attention to your heart rate for the first 15 minutes of each block - HR Z2 or less. At the 15 minute mark, bump up the pace slightly (into HR Z3) by driving your entry speed along with a smooth and early throttle on your exits. Remember, the smoother you ride, the lower your heart rate (resulting in more burned fat and the conservation of stored sugar in your liver and muscles).

Post Workout Protocols

- **Flexibility:** complete [dynamic movements](#), [static stretches](#) & foam rolling exercises for optimum recovery
- **Nutrition:** immediately consume 8-10 ounces of [Recovery Fuel](#) to replace depleted muscle sugar & repair muscle tissue

- **2 Hour Nap After Mid-Day Meal**

Misc. Notes: pay close attention to your protein intake; protein (specifically amino acids) are designed to rebuild the muscles that you have torn down during training. No matter how hard you go, you should not be tender any longer than 2 days, if you are struggling with soreness or overall fatigue levels, bump up your protein and brown bread intake. The B-Vitamins will improve the absorption of your protein for a quicker and more complete recovery.

- **Evening Protocols**

Flexibility: after your shower, grab a tennis, lacrosse or TP ball and work any trigger points in your chest & gluts

Nutrition: 15 minutes before bed, take your evening supplements with your whey protein smoothie
