#### **Monday**

- **Body Analysis – please use your Coach Robb Body Analysis Spreadsheet to log this information for evaluation purposes**
- **Complete Rest Day**  
**Misc. Notes** the key to long term improvement in your health, wellness and ultimately your performance is to improve something every day by 1%. We have discussed this together previously, but what makes this concept so powerful now is the fact that you have a foundation that makes your 1% improvement that much more powerful. The bigger the base of accomplishment, the more momentum you will gain – especially when you are void of injury or illness. Remember that the muscles, tendons, ligaments and blood chemistry are a result of what you eat and drink over the next six months – the amount of time to completely replace your body. With this in mind, plan ahead with your eating: purchasing, prepping and actually consuming the food that is high in vitamins, minerals and clean protein sources for amino acids.

- **Complete Rest Day**  
**Mental Notes:** the benefits of a rest day are actually larger than your hard workout days; this is because your body doesn't get any stronger or improve regarding your endurance during training. Your body actually improves physically when you feed it high quality, high quantity food and allow for adequate rest (7-8 hours of evening sleep and if logistically possible, 1-2 hour naps during the day). When your body sleeps deeply, for a long period of time and uninterrupted, your body releases the much-needed human growth hormone (HGH) naturally and you wake up leaner, stronger and have an improved immune system. With this in mind, please embrace your rest day as if it was one of your harder workout days; your body will appreciate it.
