

Training Cycle: Phase One
Cycle Duration: 6 Weeks
Work Week 3/6

Focus: Develop Maximum Strength & Improve Aerobic Base

Intensity Note:

- Blue highlights indicate HR Zone 2 or less (Builds your aerobic engine burns fat as a primary fuel source)
- Red highlights indicate HR Zone 3+ (Builds your strength, speed & LT burns stored sugar as a primary fuel source)

Monday

- Body Analysis please use your Coach Robb Body Analysis Spreadsheet to log this information for evaluation purposes
- (Morning Workout) Complete Racing Solutions Bike: Even Tempo Bike (60 Minutes)

Workout Notes: warm up slowly and settle into your **HR Zone 2** (no higher). Set your watch to remind yourself to drink and stretch as needed to maintain your blood sugar levels and maintain your range of motion within all working muscle groups.

Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces **COLD** <u>Energy Fuel</u> to top off both your calories and provide electrolytes for proper muscle contraction (the colder the fluid the faster the absorption).

Warm up (HR Zone 1):

Duration: 10 minutes **Gearing:** small chain ring up front, middle rear gearing **Cadence:** 80-85 (no higher/lower) **Misc.:** stretch and hydrate before moving into your main set

Main Performance Block: 45 Minutes (HR Zone 2)

Stay within the upper range of **HR Zone 2 (no higher)** the entire time; strive to keep your efficiency high (optimized pedal mechanics, changing your pedal patterns, belly breathing, etc.); stand and stretch every 5 minutes to avoid tightening up. Document how far you have traveled over 80 minutes.

Cool Down (HR Zone 1):

Duration: 5 minutes (no shorter) **Gearing:** small chain ring up front, middle rear gearing

Cadence: 70-80 (no higher/lower)

(Immediately following your bike) Complete Racing Solutions Core Work

Workout notes: complete each of the following exercises for 30 seconds; your rest interval is 30 seconds as you move to the next

exercise. Go through each exercise and then repeat the entire set - total of 2 sets.

Abdominal Roll Out on Fit Ball: click here for video
Abdominal Roll Out on Fit Ball: click here for video
Ab Crunch on Fit Ball: click here for the video link

Post Workout Protocols

- Flexibility: isolate <u>each muscle in your lower body</u> hold each stretch for 8-10 seconds
- Nutrition: consume a post recovery smoothie with two scoops of Energy Fuel to replace lost electrolytes
- Evening Protocols

Flexibility: take 10 minutes and focus on your legs and lower body - <u>click here for a complete video list</u> **Nutrition:** consume 8-10 ounces of cold/filtered water; consume a raw snack/meal.

Tuesday

- Body Analysis please use your Coach Robb Body Analysis Spreadsheet to log this information for evaluation purposes
- (Morning Workout) Complete Racing Solutions MX: Aerobic Workout #1

[Please refer to the spreadsheet at the bottom of this document]

Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces **COLD** <u>Energy Fuel</u> to top off both your calories and provide electrolytes for proper muscle contraction (the colder the fluid the faster the absorption).

Workout Notes: this workout is designed to keep you mentally focused on being smooth – lap times are irrelevant in terms of speed, but rather consistency and "how" you are creating the lap times. The fastest riders in the world "look" smooth and as a result they are fast. Most amateur riders "look" fast, but are nowhere close to the same speed – think about this and take it to the track. Execution of skills & drills will create the consistency we are looking for.

Post Workout Protocols

- Flexibility: isolate each muscle in your lower body hold each stretch for 8-10 seconds
- Nutrition: consume a post recovery smoothie with two scoops of Energy Fuel to replace lost electrolytes
- (Afternoon Workout) Complete Racing Solutions Combo Weight Workout P1 Timed Challenges (30 Seconds)

[Please use the spreadsheet and associated videos listed at the bottom of this document]

Workout Notes: these exercises are combined so that you hit all the muscles as a functional unit – the foundation for movement. Because you are using more than one muscle for each exercise, you may find yourself becoming fatigued quickly. Breathe deep and consistently throughout the exercise to maintain optimum performance. Consistently consume your Energy Fuel to maintain proper blood sugar levels and power output.

Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces **COLD** <u>Energy Fuel</u> to top off both your calories and provide electrolytes for proper muscle contraction (the colder the fluid the faster the absorption).

Speed of Lift: guick and smooth

Repetitions: as many as you can complete in 30 seconds with proper form OR number of reps as listed

Sets: 2

Rest Interval: none in between exercises; 1 minute in between cycles

Post Workout Protocols

- Flexibility: isolate each muscle in your lower body hold each stretch for 8-10 seconds
- Nutrition: consume a post recovery smoothie with two scoops of Energy Fuel to replace lost electrolytes
- Evening Protocols

Flexibility: take 10 minutes and focus on your legs and lower body - click here for a complete video list

Nutrition: consume 8-10 ounces of cold/filtered water; consume a raw snack/meal.

Wednesday

- Body Analysis please use your Coach Robb Body Analysis Spreadsheet to log this information for evaluation purposes
- (Morning Workout) Complete Racing Solutions Bike: Heart Rate Ladder Workout (60 Minutes)

Misc. Notes: take your most up to date heart rate spreadsheet (take last week's waking heart rate average and your maximum heart rate from your last time trial) and commit to memory (or use a black marker to write on your arm) the low & high number for your **HR Zone 3**. Once you are finished with your warm-up, you will spend 20 minutes toggling between your low and high ranges. At the beginning of the interval, accelerate and settle into a comfortable leg turnover (75-85) — continue to "push the pace" until you hit your upper number; as soon as you hit your top number, gear back down and spin easily until you hit your lower number — repeat in 20-minute blocks.

Warm up (HR Zone 1):

Duration: 10 minutes **Gearing:** small chain ring up front, middle rear gearing **Cadence:** 80-85 (no higher/lower) **Misc.:** stretch and hydrate before moving into your main set

Main Set: Heart Rate Pyramids: 45 Minutes (HR Z3)

Misc. Notes: Toggle between your lower and upper number in HR Z3 for 10 minutes; spin easy-recover for 5 minutes.

Repeat 10' on/5' off 3 times for a total of 45 minutes

Cool Down (HR Zone 1): Keep a close eye on your HR level for the final 10 minutes

Duration: 5 minutes **Gearing:** the easiest combination that allows for 85-90 cadence & HR Z1

Cadence: 85-90 **Misc.:** don't dismount until your heart rate is within HR Z1

(Immediately following your HR Ladders) Complete Racing Solutions Core Work

Workout notes: complete each of the following exercises for 30 seconds; your rest interval is 30 seconds as you move to the next exercise. Go through each exercise and then repeat the entire set - total of 2 sets.

Thursday

- Body Analysis please use your Coach Robb Body Analysis Spreadsheet to log this information for evaluation purposes
- (Morning Workout) Complete Racing Solutions MX: Speed Workout #1

[Please refer to the spreadsheet at the bottom of this document]

Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces **COLD** <u>Energy Fuel</u> to top off both your calories and provide electrolytes for proper muscle contraction (the colder the fluid the faster the absorption).

Workout Notes: Please have your heart rate zones (high and low) to ensure you are hitting the goal intensity levels. This workout is going to push your body exactly like race day - holding the fastest levels of speed while your body begins to fatigue. Ironically, late race day fatigue is usually a result of low blood sugar and fluids - so plan ahead. Also just like race day, the track will break down and you should strive to focus on maintaining your momentum where ever possible to save both energy and maximize your per lap average speed. Attention to details and implementing what you have trained during the week will allow you to race up to your full potential - please don't short change yourself!

Post Workout Protocols

- Flexibility: isolate each muscle in your lower body hold each stretch for 8-10 seconds
- Nutrition: consume a post recovery smoothie with two scoops of Energy Fuel to replace lost electrolytes
- (Afternoon Workout) Complete Racing Solutions Combo Weight Workout P1 Timed Challenges (30 Seconds)
 [Please use the spreadsheet and associated videos listed at the bottom of this document]

Workout Notes: these exercises are combined so that you hit all the muscles as a functional unit – the foundation for movement. Because you are using more than one muscle for each exercise, you may find yourself becoming fatigued quickly. Breathe deep and consistently throughout the exercise to maintain optimum performance. Consistently consume your Energy Fuel to maintain proper blood sugar levels and power output.

Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces **COLD** <u>Energy Fuel</u> to top off both your calories and provide electrolytes for proper muscle contraction (the colder the fluid the faster the absorption).

Speed of Lift: quick and smooth

Repetitions: as many as you can complete in 30 seconds with proper form OR number of reps as listed **Sets:** 2 **Rest Interval:** none in between exercises; 1 minute in between cycles

Post Workout Protocols

- Flexibility: isolate each muscle in your lower body hold each stretch for 8-10 seconds
- Nutrition: consume a post recovery smoothie with two scoops of Energy Fuel to replace lost electrolytes
- Evening Protocols

Flexibility: take 10 minutes and focus on your legs and lower body - click here for a complete video list

Nutrition: consume 8-10 ounces of cold/filtered water; consume a raw snack/meal.

Friday

- Body Analysis please use your Coach Robb Body Analysis Spreadsheet to log this information for evaluation purposes
- Complete Rest Day

Misc. Notes: allowing yourself to sleep and not wake up with an alarm will decrease the amount of cortisol in your blood [Note: cortisol is a hormone that is released into the blood when the body is highly stressed and referred to within the human performance community as a fat magnet]. In addition to lowering your blood cortisol levels, waking up without an alarm helps you determine what your optimum amount of sleep is given how your body his responding to the volume & intensity of training that you are maintaining. Remember, it is not what you do in training that makes you stronger, but rather what you do regarding your nutrition and hydration.

• Evening Protocols – please reference Monday's notes and links.

Saturday

- Body Analysis please use your Coach Robb Body Analysis Spreadsheet to log this information for evaluation purposes
- (Morning Workout) Complete Racing Solutions MX: Aerobic Workout #1

[Please refer to the spreadsheet at the bottom of this document]

Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces **COLD** <u>Energy Fuel</u> to top off both your calories and provide electrolytes for proper muscle contraction (the colder the fluid the faster the absorption).

Workout Notes: this workout is designed to keep you mentally focused on being smooth – lap times are irrelevant in terms of speed, but rather consistency and "how" you are creating the lap times. The fastest riders in the world "look" smooth and as a result they are fast. Most amateur riders "look" fast, but are nowhere close to the same speed – think about this and take it to the track. Execution of skills & drills will create the consistency we are looking for.

Post Workout Protocols

- Flexibility: isolate each muscle in your lower body hold each stretch for 8-10 seconds
- Nutrition: consume a post recovery smoothie with two scoops of Energy Fuel to replace lost electrolytes
- 2 Hour Nap After Lunch

Misc. Notes: as you lie down to nap, make sure that you have the room as dark and cold as possible. Research has verified that these elements contribute to the quality of your nap which results in enhanced recovery and improvement.

Evening Protocols

Flexibility: take 10 minutes and focus on your legs and lower body - click here for a complete video list

Nutrition: consume 8-10 ounces of cold/filtered water; consume a raw snack/meal.

Sunday

- Body Analysis please use your Coach Robb Body Analysis Spreadsheet to log this information for evaluation purposes
- (Morning Workout) Complete Racing Solutions MX: Speed Workout #1

[Please refer to the spreadsheet at the bottom of this document]

Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces **COLD** <u>Energy Fuel</u> to top off both your calories and provide electrolytes for proper muscle contraction (the colder the fluid the faster the absorption).

Workout Notes: Please have your heart rate zones (high and low) to ensure you are hitting the goal intensity levels. This workout is going to push your body exactly like race day - holding the fastest levels of speed while your body begins to fatigue. Ironically, late race day fatigue is usually a result of low blood sugar and fluids - so plan ahead. Also just like race day, the track will break down and you should strive to focus on maintaining your momentum where ever possible to save both energy and maximize your per lap average speed. Attention to details and implementing what you have trained during the week will allow you to race up to your full potential - please don't short change yourself!

Post Workout Protocols

- Flexibility: isolate each muscle in your lower body hold each stretch for 8-10 seconds
- Nutrition: consume a post recovery smoothie with two scoops of Energy Fuel to replace lost electrolytes
- 2 Hour Nap After Lunch

Misc. Notes: if logistically possible, do not wake yourself up from this nap with an alarm. Just out of curiosity, see how many hours your sleep. This will provide us a clear indicator of your fatigue; the big question is where this fatigue is coming from: intensity levels, duration levels, food intake, hydration levels, hours of sleep and consistency in your recovery protocols (stretching and trigger point therapy). Remember that your health and ultimately your performance is a direct result of your consistency in all these performance areas (some that require sweating and some that don't!).

 (** If You Were Able To Nap – Complete Before Dinner) Complete Racing Solutions Combo Weight Workout – P1 Timed Challenges (30 Seconds)

[Please use the spreadsheet and associated videos listed at the bottom of this document]

Workout Notes: these exercises are combined so that you hit all the muscles as a functional unit – the foundation for movement. Because you are using more than one muscle for each exercise, you may find yourself becoming fatigued quickly. Breathe deep and consistently throughout the exercise to maintain optimum performance. Consistently consume your Energy Fuel to maintain proper blood sugar levels and power output.

Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces of cold <u>Energy Fuel</u> to top off both your calories and provide electrolytes for proper muscle contraction.

Speed of Lift: quick and smooth

Repetitions: as many as you can complete in 30 seconds with proper form OR number of reps as listed

Sets: 2

Rest Interval: none in between exercises; 1 minute in between cycles

Post Workout Protocols

- Flexibility: isolate <u>each muscle in your lower body</u> hold each stretch for 8-10 seconds
- Nutrition: consume a post recovery smoothie with two scoops of Energy Fuel to replace lost electrolytes

Evening Protocols

Flexibility: take 10 minutes and focus on your legs and lower body - <u>click here for a complete video list</u> **Nutrition:** consume 8-10 ounces of cold/filtered water; consume a raw snack/meal.

Complete Racing Solutions Aerobic MX		
Workout #1	Workout Focus: Aerobic Enhancement	
	Description	Intensity
Warm Up	Focus: Gradual Warm Up	
Elapsed Time	15 Minutes of easy riding on the track - increase the intensity slightly every 5 min - very easy!	< 40%
	Stretch passively (no bouncing) from head to toe	
Main Set #1-Starts	Set Focus: Opening Lap Intensity - Consistency Challenge	Intensity
Workout Protocol:	Complete 10 starts - through the first turn and down the entire first straight (be aggressive!)	
	Keep a close eye on your body position - attack, looking up and using your legs/core combination	
	Take your time from the start to the end of the first straight away	
Elapsed Times:	Interval 1: Interval 2: Interval 3: Interval 4: Interval 5:	70-75%
Elapsed Times:	Interval 6: Interval 7: Interval 8: Interval 9: Interval 10:	70-75%
	Rest For 10 Minutes - Stretch from head to toe / Re-hydrate with Energy Fuel	
Main Set #2-20 Min. Moto	Set Focus: Intensive Endurance	Intensity
Workout Protocol:	During this 20 minute moto, your goal is to "feel" yourself getting slightly faster and validating	
	with slightly faster lap times. The question to answer is "how" are you increasing your speed?	
	Ideally your speed isn't achieved by more effort, but rather, faster transitions from gas to brakes. 5 Minutes at 75% - smooth lines/maintain momentum	75%
	5 Minutes at 80% - non optimum lines/move the bike with your muscles - not momentum	75% 80%
	10 Minutes at 85% - smooth lines/maintain momentum	85%
	Rest For 10 Minutes - Stretch from head to toe / Re-hydrate with Energy Fuel	
Main Set #3-Starts	Set Focus: Opening Lap Intensity - Consistency Challenge	Intensity
Workout Protocol:	Complete 10 starts - through the first turn and down the entire first straight (be aggressive!)	
	Keep a close eye on your body position - attack, looking up and using your legs/core combination	
	Take your time from the start to the end of the first straight away	
Elapsed Times:	Interval 1: Interval 2: Interval 3: Interval 4: Interval 5:	70-75%
Elapsed Times:	Interval 6: Interval 7: Interval 8: Interval 9: Interval 10:	70-75%
	Rest For 10 Minutes - Stretch from head to toe / Re-hydrate with Energy Fuel	
Main Set #4-20 Min. Moto	Set Focus: Intensive Endurance	Intensity
Workout Protocol:	Use your lap times from Main Set #2 and see how close you can come to them (now that the track	
	has broken down) at the same intensity levels. The best riders in the world are able to maintain	
	a low heart rate in rough riding conditions by focusing on being smooth and relaxed.	750/
	5 Minutes at 75% - smooth lines/maintain momentum 5 Minutes at 80% - non optimum lines/move the bike with your muscles - not momentum	75% 80%
	10 Minutes at 85% - smooth lines/maintain momentum	85%
	Rest For 10 Minutes - Stretch from head to toe / Re-hydrate with Energy Fuel	
Main Set #5-Turns for 15		
minutes	Set Focus: Body Balance - Timing of faster cornering	Intensity
Workout Protocol:	Drive down a straight and challenge yourself on the positioning of your body along with the use of	70-75%
	the clutch, brake and throttle. Take the time to "learn" the timing of this to shave 1/2 second per	
	lap. As you drive closer into the corner, simply increase the speed that you approach the corner.	
	Rest For 10 Minutes - Stretch from head to toe / Re-hydrate with Energy Fuel	
	REPEAT THE STARTS/15 MIN MOTO/15 MIN MOTO/TURNS	
Warm Down	10 Minutes of easy riding - nothing structured or intense (watch the HR monitor to ensure)	40%

Complete Racing Solutions MX Speed Workout	Western Ferrar Consistent Pres Consid	
#1	Workout Focus: Consistent Race Speed Total Ride Time: 60 Minutes Description	
Warm Up	Set Focus: Gradual Warm Up	Intensity
	Instructional Video on how to set up the Concept 2 Rower Ride either a bike or Concept 2 Rower easy for 10 minutes - even tempo Stretch passively (no bouncing) from head to toe / Re-hydrate with Energy Fuel	Less Than 50%
Main Set #1	Focus: Smooth start and fast five (5) laps	Intensity
Workout Protocol:	Complete a start and then merge onto the track just like a race. Over the next five laps, maintain the highest rate of speed while staying consistent for all five laps Moto Specific Heart Rate Zone - Low # High #	90-95%
Elapsed Times:	5 Lap Elapsed Time Int #1: Fastest Lap: Max HR:	
	Rest For 10 Minutes - Stretch from head to toe / Re-hydrate	
Elapsed Times:	5 Lap Elapsed Time Int #1: Fastest Lap: Max HR:	
	Rest For 10 Minutes - Stretch from head to toe / Re-hydrate with Energy Fuel	
Main Set #2	Focus: Smooth start and fast three (3) laps	Intensity
Workout Protocol:	Your goal is to maintain the match or beat your fastest lap from Set #1 Moto Specific Heart Rate Zone - Low # High #	
Elapsed Times:	3 Lap Elapsed Time Int #1: Fastest Lap: Max HR:	
	Rest For 5 Minutes - Stretch from head to toe / Re-hydrate with Energy Fuel	
Elapsed Times:	3 Lap Elapsed Time Int #1: Fastest Lap: Max HR:	
	Rest For 10 Minutes - Stretch from head to toe / Re-hydrate with Energy Fuel	
Main Set #3	Focus: Smooth start and fast two (2) laps	Intensity
Workout Protocol:	Your goal is to maintain the match or beat your fastest lap from Set #2 Moto Specific Heart Rate Zone - Low # High #	90-95%
Elapsed Times:	2 Lap Elapsed Time Int #1: Fastest Lap: Max HR:	
	Rest For 3 Minutes - Stretch from head to toe / Re-hydrate with Energy Fuel	
Elapsed Times:	2 Lap Elapsed Time Int #1: Fastest Lap: Max HR:	
Warm Down	Easy riding - nothing structured or intense; allow the HR to come down slowly	40%
	Pre-Riding Weight: Total Fluids Consumed: Post-Riding Weight: Loss/Gain	

Complete Racing Solutions MX Speed Workout #1

Workout Notes: Please have your heart rate zones (high and low) to ensure you are hitting the goal intensity levels.

This workout is going to push your body exactly like race day - holding the fastest levels of speed while your body begins to fatigue. Ironically, late race day fatigue is usually a result of low blood sugar and fluids - so plan ahead. Also just like race day, the track will break down and you should strive to focus on maintaining your momentum where ever possible to save both energy and maximize your per lap average speed. Attention to details and implementing what you have trained during the week will allow you to race up to your full potential - please don't short change yourself!
