

Training Cycle: Phase 5
Cycle Duration: 6 Weeks
Work Week 4/6

Focus: Race Specific Speed, Strength and Endurance

Intensity Note:

- Blue highlights indicate HR Zone 2 or less (Builds your aerobic engine burns fat as a primary fuel source)
- Red highlights indicate HR Zone 3+ (Builds your strength, speed & LT burns stored sugar as a primary fuel source)

Monday

- Body Analysis: please use your Coach Robb Body Analysis Spreadsheet to log this information for evaluation purposes
- Complete Rest Day

Misc. Notes: though we have discussed this a lot in the past, dedicate some extra attention to your sweat rate this week. Keep in mind that a sweat rate above 2% can decrease your power and strength significantly. It doesn't make sense to spend so much time developing your strength only to have it eroded by dehydration. Watch the color of your urine throughout the day – it should be relatively clear. If your urine is slightly discolored and you haven't consumed a B Vitamin, then you need to bump up both your hydration intake (half of your body weight in ounces of water) and your amino acid intake (your body is breaking down muscle tissue hence the discoloration of your urine if you are well hydrated).

Evening Mental Protocols: watch this video in a place where you have zero distractions for 5 minutes (the length of the video).
 Psychology: concept video "What is Contrast Therapy" – video link

Tuesday

 Body Analysis: please use your Coach Robb Body Analysis Spreadsheet to log this information for evaluation purposes (Morning Workout) Complete Racing Solutions MX Speed Workout #1 [Please refer to the spreadsheet at the bottom of this document]

Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces of ice cold <u>Energy Fuel</u> to help stabilize your blood sugar levels throughout the workout. Remember, cooler fluids absorb quicker than warmer fluids.

Workout Notes: pay extra attention to your heart rate for the first 15 minutes of each block - HR Z2 or less. At the 15-minute mark, bump up the pace slightly (into HR Z3) by driving your entry speed along with a smooth and early throttle on your exits. Remember, the smoother you ride, the lower your heart rate (resulting in more burned fat and the conservation of stored sugar in your liver and muscles).

Post Workout Protocols

- o Flexibility: complete an entire stretch routine for your hips, hamstrings, quads and calves CLICK HERE
- Nutrition: immediately consume <u>Best Whey Protein</u> to shorten your recovery window and replace depleted muscle sugar (making tomorrows workouts more productive).
- (Afternoon Workout) Complete Racing Solutions Combo Weight Workout Muscular Endurance (Note: 1 Minute in duration)
 [Please use the spreadsheet and associated videos listed at the bottom of this document]

Workout Notes: these exercises are familiar with a longer duration.

Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces of ice cold **Energy Fuel** to help stabilize your blood sugar levels throughout the workout. Remember, cooler fluids absorb quicker than warmer fluids.

Sets: 2

Duration: 60 Seconds (unless otherwise noted)

Post Workout Protocols

Speed of Lift: consistent through entire range of motion **Rest Interval:** none in between exercises; 1:00 in between cycles

- Flexibility: complete an entire stretch routine for your hips, hamstrings, quads and calves <u>CLICK HERE</u>
- Nutrition: immediately consume <u>Best Whey Protein</u> to shorten your recovery window and replace depleted muscle sugar (making tomorrows workouts more productive).
- Evening Mental Protocols: watch this video in a place where you have zero distractions for 5 minutes (the length of the video).
 Psychology: concept video "What is Contrast Therapy" video link

Wednesday

Body Analysis: please use your Coach Robb Body Analysis Spreadsheet to log this information for evaluation purposes (Complete One of the Following) Complete Racing Solutions Row: Pacing Intervals (70 Minutes)

> Workout notes: to maximize your productivity for this workout, you will need to have your display set to pace & easily available to you. Each interval block will last five (5) minutes with five (5) minute recovery (no shorter to maintain good form & optimum power output).

Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces of ice cold Energy Fuel to help stabilize your blood sugar levels throughout the workout. Remember, cooler fluids absorb quicker than warmer fluids.

Warm Up: HR Zone 1: Focus on a straight back and leading with your legs and finishing with your arms coming to your chest.

Duration: 3000 Meters Pull Rate: less than 25 Stretch from head to toe Load Level: 3

REPEAT THE FOLLOWING FOR 50 Minutes

Load Levels: 5

REPEAT THE FOLLOWING FOR 50 Minutes

Each minute you will increase your pull rate and/or you pace by 5-10 seconds. For example: Minute 1-2:00 pace, Minute 2-1:55 pace, etc.

Hit your goal pace of each minute after being established by interval #1(hold yourself accountable here).

5 Minute Recovery Block

5 minutes of easy pulling; you can't pull too easy here.

Misc. Notes: Hydrate with Energy Fuel every 10 minutes to maintain your blood sugar levels

Cool Down-HR Zone 1: Focus on a straight back and leading with your legs and finishing with your arms coming to your chest.

Load Level: 3 **Duration:** 1000 Meters **Pull Rate:** less than 25 Stretch from head to toe

Complete Racing Solutions Bike: Pacing Intervals (70 Minutes)

REPEAT THE FOLLOWING FOR 50 Minutes

Workout notes: to maximize your productivity for this workout, you will need to have your bike computer set to speed & easily available to you. Each interval block will last five (5) minutes with five (5) minute recovery (no shorter to maintain optimum power

Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces of ice cold Energy Fuel to help stabilize your blood sugar levels throughout the workout. Remember, cooler fluids absorb quicker than warmer fluids.

Warm up (HR Zone 1):

Duration: 15 minutes Gearing: small chain ring up front, middle rear gearing Cadence: 80-85 (no higher/lower) Misc.: stretch and hydrate before moving into your main set

5 Minute Pacing Block (NO Higher than HR Z3)

Each minute you will *increase your speed by 1 mph*. For example: Minute 1-15 mph, Minute 2-16 mph, etc. Adjust your gearing so that your cadence stays within 75-85 but still hit your goal pace of each minute after being established by interval #1(hold yourself accountable here).

5 Minute Recovery Block (NO Higher than HR Z2)

5 minutes of easy spinning; you can't spin too easy here.

Misc. Notes: Hydrate with Energy Fuel every 10 minutes to maintain your blood sugar levels

Cool Down (HR Zone 1): Keep a close eye on your HR level for the final 5 minutes

Duration: 5 minutes **Gearing:** the easiest combination that gets you into HR Z1 **Cadence:** 85-90 Misc.: don't dismount until your heart rate is within HR Z1

(Immediately following your Pacing Intervals) Complete Racing Solutions Core Work

Workout notes: complete each of the following exercises for 30 seconds; your rest interval is 30 seconds as you move to the next exercise. Go through each exercise and then repeat the entire set - total of 2 sets.

Push Ups & Knee to Chest: click here for video Pike-Side to Side Steps: click here for the video link

- Flexibility: complete an entire stretch routine for your hips, hamstrings, quads and calves CLICK HERE
- Nutrition: immediately consume Best Whey Protein to shorten your recovery window and replace depleted muscle sugar (making tomorrows workouts more productive).
- Evening Mental Protocols: watch this video in a place where you have zero distractions for 5 minutes (the length of the video). Psychology: concept video "What is Contrast Therapy" - video link

Thursday

 Body Analysis: please use your Coach Robb Body Analysis Spreadsheet to log this information for evaluation purposes (Morning Workout) Complete Racing Solutions MX Aerobic Workout #1 [Please refer to the spreadsheet at the bottom of this document]

Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces of ice cold **Energy Fuel** to help stabilize your blood sugar levels throughout the workout. Remember, cooler fluids absorb quicker than warmer fluids.

Workout Notes: the emphasis for this workout is to lower your overall effort (based exclusively on your heart rate) and learn how to ride smooth, yet efficiently fast. It doesn't take a lot for you to "push the pace"; however, it will take patience and mental focus to find a comfortable speed with a lower overall heart rate. By following the indicated intensity levels, you will learn that you can actually become faster by lowering your effort down thanks to the momentum you will create. Remember, stay focused and Ride Smart Not Hard!

Post Workout Protocols

- Flexibility: complete an entire stretch routine for your hips, hamstrings, quads and calves <u>CLICK HERE</u>
- Nutrition: immediately consume <u>Best Whey Protein</u> to shorten your recovery window and replace depleted muscle sugar (making tomorrows workouts more productive).
- (Afternoon Workout) Complete Racing Solutions Combo Weight Workout Muscular Endurance (Note: 1 minute in duration)
 [Please use the spreadsheet and associated videos listed at the bottom of this document]

Workout Notes: these exercises are familiar with a longer duration.

Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces of ice cold **Energy Fuel** to help stabilize your blood sugar levels throughout the workout. Remember, cooler fluids absorb quicker than warmer fluids.

Sets: 2 Speed of Lift: consistent through entire range of motion

Duration: 60 Seconds (unless otherwise noted) Rest Interval: none in between exercises; 1:00 in between cycles

Post Workout Protocols

- o **Flexibility:** complete an entire stretch routine for your hips, hamstrings, quads and calves <u>CLICK HERE</u>
- Nutrition: immediately consume <u>Best Whey Protein</u> to shorten your recovery window and replace depleted muscle sugar (making tomorrows workouts more productive).
- Evening Mental Protocols: watch this video in a place where you have zero distractions for 5 minutes (the length of the video).

Saturday

 Body Analysis – please use your Coach Robb Body Analysis Spreadsheet to log this information for evaluation purposes (Morning Workout) Complete Racing Solutions MX Speed Workout #2
 [Please refer to the spreadsheet at the bottom of this document]

Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces of ice cold **Energy Fuel** to help stabilize your blood sugar levels throughout the workout. Remember, cooler fluids absorb quicker than warmer fluids.

Workout Notes: we are going to change the format around, sprint early and then settle into a comfortable pace. To maximize your efforts, when back down your intensity, strive to maintain consistent fundamentals. Many are not aware that what makes riding and racing so fatiguing is bouncing off of the faces and deviating from fundamentals. Capture your lap times and compare your heart rate data to see how much "faster" you were riding during your opening laps along with what "effort" did it take to obtain these lap times.

Post Workout Protocols

- Flexibility: complete an entire stretch routine for your hips, hamstrings, quads and calves <u>CLICK HERE</u>
- Nutrition: immediately consume <u>Best Whey Protein</u> to shorten your recovery window and replace depleted muscle sugar (making tomorrows workouts more productive).
- 2 Hour Power Nap after lunch

Misc. Notes: prior to your nap, consume a meal that is high in MCT's (medium chain triglycerides) - extra virgin olive oil, avocadoes, raw coconut, raw nuts and cold-water fish (salmon). This quality fat will be used to recharge your body from the inside out wile satisfying your appetite so that you can sleep soundly for 2-3 hours. When you wake up, consume 8-10 ounces of cold water and 2 scoops of Energy Fuel.

Evening Mental Protocols: watch this video in a place where you have zero distractions for 5 minutes (the length of the video).
 Psychology: concept video "What is Contrast Therapy" – video link

Sunday

 Body Analysis – please use your Coach Robb Body Analysis Spreadsheet to log this information for evaluation purposes (Morning Workout) Complete Racing Solutions MX Aerobic Workout #2
 [Please reference the spreadsheet at the bottom of this document]

Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces of ice cold **Energy Fuel** to help stabilize your blood sugar levels throughout the workout. Remember, cooler fluids absorb quicker than warmer fluids.

Workout Notes: this workout is long, so the intensity needs to be low (wear your heart rate monitor to help keep you within the optimum zones). By staying aerobic during the entire workout, you are teaching your body to burn body fat as a primary fuel source. This will result in an improved VO2 Max along with a decreased percentage of body fat. If you feel anything tighten up, stop immediately, isolate and stretch the tissue passively until it releases.

2 Hour Power Nap after lunch

Misc. Notes: prior to your nap, consume a meal that is high in MCT's (medium chain triglycerides) – extra virgin olive oil, avocadoes, raw coconut, raw nuts and Coldwater fish (salmon). This quality fat will be used to recharge your body from the inside out wile satisfying your appetite so that you can sleep soundly for 2-3 hours. When you wake up, consume 8-10 ounces of cold water and 2 scoops of Energy Fuel.

Post Workout Protocols

- o Flexibility: complete an entire stretch routine for your hips, hamstrings, quads and calves CLICK HERE
- Nutrition: immediately consume <u>Best Whey Protein</u> to shorten your recovery window and replace depleted muscle sugar (making tomorrows workouts more productive).
- (Afternoon Workout Complete one of the following) Complete Racing Solutions Bike: Even Tempo/ Aerobic Enhancement (70 Minutes)

Workout Notes: the key to this workout is making sure that you stay within HR Z2 (no higher); this will teach your body to spare sugar and burn stored body fat for energy (making you leaner and improving your VO2 Max).

Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces of ice cold **Energy Fuel** to help stabilize your blood sugar levels throughout the workout. Remember, cooler fluids absorb quicker than warmer fluids.

Warm Up: HR Zone 1

Duration: 10 minutes

Gearing: small chain ring up front, middle rear gearing

Misc.: stretch and hydrate before moving into your main set

Main Performance Block: 55 minutes (HR Zone 2)

Set Notes: with your cadence between 75-85; tallest gearing that you can maintain while keeping the chain tension tight and maintaining your cadence zone; every 5 minutes stand up and stretch your hamstrings, quads, calves and lower back.

Warm down: 5 Minutes (HR Zone 1)
Duration: 5 minutes (no shorter)

Gearing: small chain ring up front, middle rear gearing

Misc. Notes: stretch your lower back, calves and quads prior to dismounting

Cadence: 70-80 (no higher/lower) Misc. Notes: stretch your lower back, calves and quads prior to dismounting **Post Workout Protocols**

- o Flexibility: complete an entire stretch routine for your hips, hamstrings, quads & calves CLICK HERE
- Nutrition: immediately consume <u>Best Whey Protein</u> to shorten your recovery window and replace depleted muscle sugar (making tomorrows workouts more productive).
- Complete Racing Solutions Row: Incremental Pacing Intervals (70 Minutes)

Misc. Notes: the key to this workout is making sure that you stay within HR Z2 (no higher); this will teach your body to spare sugar and burn stored body fat for energy (making you leaner and improving your VO2 Max).

Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces of ice cold **Energy Fuel** to help stabilize your blood sugar levels throughout the workout. Remember, cooler fluids absorb quicker than warmer fluids.

Warm up-HR Zone 1: Focus on a straight back and leading with your legs and finishing with your arms coming to your chest. **Display:** Time **Load Level: 3 Duration:** 10 Minutes **Pull Rate:** less than 25 **Stretch from head to toe**

Main Set: 55 Minutes within HR Z2 (no higher or lower): Form is more important than pace to avoid injury

Display: Time **Load Level: 5 Duration:** 45 Minutes **Pull Rate:** 25-30 **Hydrate:** every 10 minutes

Cool Down-HR Zone 1: Focus on a straight back and leading with your legs and finishing with your arms coming to your chest. **Load Level: 3 Duration:** 5 Minutes **Pull Rate:** less than 25 **Post Workout Protocols**

- o Flexibility: complete an entire stretch routine for your hips, hamstrings, quads and calves CLICK HERE

| | Rest For 10 Minutes - Stretch from head to toe / Re-hydrate with Energy Fuel | | | | | |
| Warm Down | 5 min/easy ridir | ng - nothing struc | tured or intense: | watch the HR an | d wait for it to come down | < 40% |

Complete Racing Solutions MX Speed Workout #2

Workout Notes: we are going to change the format around; sprint early and then settle into a comfortable pace. To maximize your efforts, when back down your intensity, strive to maintain consistent fundamentals. Many are not aware that what makes riding and racing so fatiguing is bouncing off of the faces and deviating from fundamentals. Capture your lap times and compare your heart rate data to see how much "faster" you were riding during your opening laps along with what "effort" did it take to obtain these lap times.

- o Flexibility: complete an entire stretch routine for your hips, hamstrings, quads and calves CLICK HERE
- Nutrition: immediately consume <u>Best Whey Protein</u> to shorten your recovery window and replace depleted muscle sugar (making tomorrows workouts more productive).

| Workout Protocol: | Complete your interval with a start and then settle into the track at a pace that you can | | | | | |
| | maintain (less than a two second deviation) for 30 minutes | | | | | |
| | | | | | | |
| | Don't take lap times, instead change up your lines every lap: one fast, one non-optimized. | | | | | |
| | Your overall intensity needs to be aerobic - use your HR monitor to evaluate the actual number | | | | | |
| | Rest For 10 Minutes - Stretch from head to toe / Re-hydrate with Energy Fuel | | | | | |
| Warm Down | 10 Minutes of easy riding - nothing structured or intense (watch the HR monitor to ensure) | < 40% | | | | |

Complete Racing Solutions MX Aerobic Workout #2

Workout Notes: this workout is long, so the intensity needs to be low (wear your heart rate monitor to help keep you within the optimum zones). By staying aerobic during the entire workout, you are teaching your body to burn body fat as a primary fuel source. This will result in an improved VO2 Max along with a decreased percentage of body fat. If you feel anything tighten up, stop immediately, isolate and stretch the tissue passively until it releases.
