Cycle Duration:
Work Week
Focus:

Phase 2
8 Weeks
4/8
Active Recovery (Absorb the last three weeks of testing and training)

Intensity Note:

- **Blue highlights indicate HR Zone 2 or less (Builds your aerobic engine – burns fat as a primary fuel source)**
- **Red highlights indicate HR Zone 3+ (Builds your strength, speed & LT – burns stored sugar as a primary fuel source)**

Monday

- **Body Analysis – please use your Coach Robb Body Analysis Spreadsheet to log this information for evaluation purposes**
Note: If your heart rate is up by four or more beats over last week's average – do not train, sleep and eat instead
- **(Choose one of the following for your morning workout) Complete Racing Solutions Bike: Heart Rate Pacing Blocks (60 Minutes)**

Misc. Notes: for this workout you will need to know your **HR Z2** numbers (high and low specific number).

Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces of cold [Energy Fuel](#) to top off both your calories and provide electrolytes for proper muscle contraction.

Warm up-HR Zone 1: Focus on [optimum pedal mechanics](#) right from the beginning

Duration: 5 minutes

Gearing: small chain ring up front, middle rear gearing

Cadence: 80-85 (no higher/lower)

Misc.: stretch and hydrate before moving into your main set

Main Set: Heart Rate Pacing Blocks: 50 Minutes

Settle into the low end of **HR Z2** and maintain for **8-minutes**

After 8 minutes increase your intensity to the high end of **HR Z2** and maintain for **2 minutes**.

After 2 minutes, lower your effort back to the lower end of **HR Z2**

Repeat for 50 minutes.

Cool Down: HR Zone 1: Keep a close eye on your HR level for the final 5 minutes

Duration: 5 minutes

Gearing: the easiest combination that gets you into **HR Z1**

Cadence: 85-90

Misc.: don't dismount until your heart rate is within **HR Z1**

- **Complete Racing Solutions Row: Heart Rate Pacing Blocks (60 Minutes)**

Misc. Notes: for this workout you will need to know your **HR Z2** numbers (high and low specific number).

Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces of cold [Energy Fuel](#) to top off both your calories and provide electrolytes for proper muscle contraction.

Warm up (HR Z1): Focus on a straight back and leading with your legs and finishing with your arms coming to your chest.

Load Level: 3

Duration: 5 Minutes

Pull Rate: less than 25

[Stretch your lower body](#)

Main Set: Heart Rate Pacing Blocks: 50 Minutes

Settle into the low end of **HR Z2** and maintain for **8 minutes**

After 8 minutes increase your intensity to the high end of **HR Z2** and maintain for **2 minutes**.

After 2 minutes, lower your effort back to the lower end of **HR Z2**

Repeat for 50 minutes.

Friday

- **Body Analysis – please use your Coach Robb Body Analysis Spreadsheet to log this information for evaluation purposes**

- **Complete Rest Day**

Misc. Notes: sit down with a piece of blank paper and draw a line down the middle of the paper. On the left side of the paper, jot down the five most important reasons for WHY you do what you do. On the right side of the paper next to each reason why you do what you do, think about the elements (people, locations, tools, etc.) that make the WHY possible. Though this may sound odd, your focus for today is to ensure that all of your elements are ready for action throughout the rest of the week. For example, if you say that you train to be lean and strong, then visit your refrigerator and examine if you have all the fresh fruit and vegetables that you like and know improve your health and performance. If you use a blender to make your fresh smoothies, make sure that it is washed and ready to use. Continue down the list to make sure that you have everything that you need to ensure that your WHY for doing is optimized.

- **Evening Protocols**

Nutrition: consume 8 ounces of Energy Fuel to top off your electrolytes and hydration levels

Foam Roller & Trigger Point Therapy: soften the muscle and connective tissue with the foam roller & then apply TP therapy

Diaphragmatic Breathing: [click here](#) to strengthen you diaphragm (your breathing muscle), breath through a straw & nose closed

Saturday

- **Body Analysis – please use your Coach Robb Body Analysis Spreadsheet to log this information for evaluation purposes**

Note: If your heart rate is up by four or more beats over last week's average – do not train, sleep and eat instead

- **(Afternoon Workout) Complete Racing Solutions MX Aerobic Workout #1**

[Please refer to the spreadsheet at the bottom of this document]

Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces of cold [Energy Fuel](#) to top off both your calories and provide electrolytes for proper muscle contraction.

Workout Notes: don't let the intensity levels throw you off, if you maintain 80% for 90 minutes, you will find that you have plenty of energy for the last set. Make a mental decision to NOT increase your effort (based on your heart rate) even though you will be comfortable enough to do so. Keep in mind that this workout needs to be completed within your aerobic intensity zones to ensure that you are ready for your high intensity workouts during the rest of the week.

Post Workout Protocols

- **Flexibility:** complete [dynamic movements](#), [static stretches](#) & foam rolling exercises for optimum recovery
- **Nutrition:** immediately consume 8-10 ounces of [Recovery Fuel](#) to replace depleted muscle sugar & repair muscle tissue

- **2 Hour Nap After Lunch**

Misc. Notes: immediately following your lunch of high-quality greens and fruits, lie down in a dark cold room and strive to get two to three hours of sleep. This window of sleep will provide your body with the opportunity to release natural growth hormones to begin the recovery process from this morning's workout. When you wake up, immediately consume a fruit smoothie and a serving of amino acids to provide your body the building blocks necessary to repair your muscles.

- **Evening Protocols**

Nutrition: consume 8 ounces of Energy Fuel to top off your electrolytes and hydration levels

Foam Roller & Trigger Point Therapy: soften the muscle and connective tissue with the foam roller & then apply TP therapy

Diaphragmatic Breathing: [click here](#) to strengthen you diaphragm (your breathing muscle), breath through a straw & nose closed

Sunday

- **Body Analysis** – please use your **Coach Robb Body Analysis Spreadsheet** to log this information for evaluation purposes
Note: If your heart rate is up by four or more beats over last week's average – do not train, sleep and eat instead
- **Complete Racing Solutions MX Workout (2 Hours Total)**
 - Pre-Hydration & Nutrition:** 10-15 minutes prior to this workout, consume 8-10 ounces of cold [Energy Fuel](#) to top off both your calories and provide electrolytes for proper muscle contraction.
 - Workout Notes:** break your riding up into 15-minute sessions with 15 minutes rest; maintain a HR of Z3 or less for your entire time on the track. Refrain from "training", simply go ride your motorcycle – have fun railing turns or jumping. Stretch with dynamic movements prior to getting back on the bike.
 - Post Workout Protocols**
 - **Flexibility:** complete [dynamic movements](#), [static stretches](#) & foam rolling exercises for optimum recovery
 - **Nutrition:** immediately consume 8-10 ounces of [Recovery Fuel](#) to replace depleted muscle sugar & repair muscle tissue
- **2 Hour Nap After Lunch**
 - Misc. Notes:** research has validated that your pituitary gland releases the greatest amount of hGH which is responsible for important elements like rebuilding muscle tissue and how lean you are – the two key elements of your strength to weight ratios. To ensure that you fall asleep quickly and sleep as deep as possible, consume a lunch that contains high levels of high-quality protein & fat (they only thing that satisfies your appetite).
- **Evening Protocols**
 - Nutrition:** consume 8 ounces of Energy Fuel to top off your electrolytes and hydration levels
 - Foam Roller & Trigger Point Therapy:** soften the muscle and connective tissue with the foam roller & then apply TP therapy
 - Diaphragmatic Breathing:** [click here](#) to strengthen you diaphragm (your breathing muscle), breath through a straw & nose closed
