Choose one of the following for your afternoon workout:

- **Complete Racing Solutions Row: HR Intensity Blocks**

Workout Notes: this workout is going to acclimate your body to staying comfortable while it is working at a high level of intensity. To maximize the amount of oxygen available to your working muscles, focus on [diaphragmatic breathing](#) through your stomach and then your chest. Remember to lead with your legs for maximum power output and optimized endurance.

Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces of ice cold [Energy Fuel](#) to top off both your calories and provide electrolytes for proper muscle contraction.

Warm up: HR Zone 1: Focus on a straight back and leading with your legs and finishing with your arms coming to your chest.

Load Level: 3 **Distance:** 2000 Meters **Pull Rate:** 20-25 **Stretch from head to toe**

Complete Rest Day

Misc. Notes pay close attention to your food intake prior to lying down to sleep (both for your naps and evening rest). When you are sleeping, your brain is fed from the stored sugar in your liver. If your brain doesn't get enough fuel (in the form of sugar), you will not stay in the deepest level of sleep (REM 3 and 4) which will hinder your body's release of hGH (human growth hormone) resulting in reduced recovery and rejuvenation. As we have discussed previously, the only thing that satisfies hunger is protein and fat so make sure that are including high quality protein and fats to each snack and meal; when your body is satisfied with high quality food, you will sleep deeper and longer (because you don't wake up) helping improve your recovery and development of new muscle tissue (helping you improve your strength & endurance). Implement the 1% rule, improve your program (sleep, food, stretching, hydration, etc.) by 1% per day and where will you be in a month, six months or a year!

- **Evening Protocols**

Mental Imagery: after implementing 10-15 deep belly breathes, visualize your next race – start to finish. See yourself implementing & maintaining perfect mechanics in every situation.

Shin Stripping: in addition to your foam [Roller & TP therapy](#); take your thumb and firmly press along the edge of your shin bone from your ankle up to your knee area. Saturday

- **Body Analysis** – please use your **Coach Robb Body Analysis Spreadsheet** to log this information for evaluation purposes
- **(Morning Workout) Complete Racing Solutions MX Speed Workout #1**

[Please refer to the spreadsheet at the bottom of this document]

Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces of ice cold [Energy Fuel](#) to top off both your calories and provide electrolytes for proper muscle contraction.

Workout Notes: this workout is designed to hold you accountable both mentally and physically. In our sport, late moto fatigue is usually associated with inefficiency and poor fundamentals late in a race. Look up the track and use your core to move the bike around to help save energy. Maintain proper blood sugar levels to ensure that your eye hand coordination is optimized.

Post Workout Protocols

- **Flexibility:** complete an [entire stretch routine](#) for your hips, hamstrings, quads and calves
- **Nutrition:** immediately consume [Recovery Fuel](#) to shorten your recovery window and replace depleted muscle sugar (making tomorrows workouts more productive).

Choose one of the following for your evening workout:

- **Complete Racing Solutions Row: HR Intensity Blocks (60-70 Minutes)**

Misc. Notes: for maximum productivity, pay close attention to your intensity levels throughout this workout. Your awareness of what each intensity level “feels” like increases your familiarity of the intensity and associated speed. This awareness also provides you feedback regarding how long you can maintain the various intensity levels (keep in mind the inverse relationship of volume & intensity – the higher the intensity, the lower the duration you can maintain and visa versa).

Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces of ice cold [Energy Fuel](#) to top off both your calories and provide electrolytes for proper muscle contraction.

Warm up-HR Zone 1: Focus on a straight back and leading with your legs and finishing with your arms coming to your chest.

Load Level: 3 Duration: 10 Minutes Pull Rate: less than 25 Stretch from head to toe

Main Set#1: Have your HR Zones written down and easily visible during this workout to eliminate you missing your intensity levels

Load Level: 5 Pull Rate: 25-35

Settle into each HR Zone as quickly as possible and then settle into the effort level with perfect form and deep breathing

Five Minutes: Upper range (5 beats of your top number) of HR Z2

Five Minutes: Lower range (5 beats of your low number) of HR Z3

Five Minutes: Upper range (5 beats of your top number) of HR Z3

Repeat – for a total of 30 minutes

Transition Set: 5 minutes of easy pulling/active recovery – strive to get your HR into Z1 for the majority of this 5 minutes

Main Set#2: Heart Rate Acceleration

Load Level: 5 Pull Rate: 25+

From HR Z1 – accelerate until you reach the upper end of your HR Z3 (no higher)

Recover by pulling easy until your HR reaches your lowest number in HR Z2

Repeat 3x

Misc. Notes: lead with your legs and a tight core to distribute the load to your legs, back and your shoulders

Cool Down-HR Zone 1: Focus on a straight back and leading with your legs and finishing with your arms coming to your chest.

Load Level: 2 Duration: 10 Minutes Pull Rate: less than 25 Stretch from head to toe

- **Complete Racing Solutions Bike: Intensity Distance Intervals (55 Minutes)**

Misc. Notes: Once you are finished with your warm-up, your goal is to settle into your HR Z3 (no higher or lower) and complete a 5 minute “interval”. Once you settle into this intensity zone, focus on your belly breathing to maximize your oxygen uptake; this will allow you to maintain your speed while staying in your HR Z3. During your 5 minute rest interval, spin easy and allow your HR to get back into HR Z1.

Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces of ice cold [Energy Fuel](#) to top off both your calories and provide electrolytes for proper muscle contraction.

Warm up-HR Zone 1: Focus on [optimum pedal mechanics](#) right from the beginning

Duration: 10 minutes

Cadence: 80-85 (no higher/lower)

Gearing: small chain ring up front, middle rear gearing

Misc.: stretch and hydrate before moving into your main set

Main Set: Heart Rate Pyramids: 4 x 10 Minutes

Settle into low end of HR Z3 and maintain for 5 minutes (Accelerate and get there quickly)

Recover by spinning easy for 5 minutes in HR Z1 (no higher for optimum recovery)

Cool Down-HR Zone 1: Keep a close eye on your HR level for the final 2 minutes

Duration: 5 minutes

Cadence: 85-90

Gearing: the easiest combination that allows for 85-90 cadence & HR Z1

Misc.: don't dismount until your heart rate is within HR Z1

- **(Immediately following your above workout) Complete Racing Solutions Abdominal & Lower Back Work**
Workout notes: complete each of the following exercises for **20 seconds**; your rest interval is **40 seconds** as you move to the next exercise. Go through each exercise and then repeat the entire set - total of 2 sets.
Standing Abdominal Twists: [click here for video](#) **Abdominal Pike on Fit Ball:** [click here for video](#)
Abdominal Roll Out on Fit Ball: [click here for video](#) **Ab Crunch on Fit Ball:** [click here for the video link](#)
Post Workout Protocols
 - **Flexibility:** complete an [entire stretch routine](#) for your hips, hamstrings, quads and calves
 - **Nutrition:** immediately consume [Recovery Fuel](#) to shorten your recovery window and replace depleted muscle sugar (making tomorrows workouts more productive).
- **2 Hour Nap After Mid-Day Meal**
Misc. Notes: immediately following your lunch of high-quality greens and fruits, lie down in a dark cold room and strive to get two to three hours of sleep. This window of sleep will provide your body with the opportunity to release natural growth hormones to begin the recovery process from this morning's workout. When you wake up, immediately consume a fruit smoothie and a serving of amino acids to provide your body the building blocks necessary to repair your muscles.
- **Evening Protocols**
Mental Imagery: after implementing 10-15 deep belly breathes, visualize your next race – start to finish. See yourself implementing & maintaining perfect mechanics in every situation.
Shin Stripping: in addition to your foam [Roller & TP therapy](#); take your thumb and firmly press along the edge of your shin bone from your ankle up to your knee area. When you feel a knot or sticky spot, apply slightly more pressure and hold for 5-10 seconds then slide further up the shin. Complete both sides of the shin bone for both legs.

Sunday

- **Body Analysis – please use your Coach Robb Body Analysis Spreadsheet to log this information for evaluation purposes**
- **(Morning Workout) Complete Racing Solutions MX Aerobic Workout #1**
[Please refer to the spreadsheet at the bottom of this document]
Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces of ice cold [Energy Fuel](#) to top off both your calories and provide electrolytes for proper muscle contraction.

Workout Notes: this workout is long, so the intensity needs to be low (wear your heart rate monitor to help keep you within the optimum zones). By staying aerobic during the entire workout, you are teaching your body to burn body fat as a primary fuel source. This will result in an improved VO2 Max along with a decreased percentage of body fat. If you feel anything tighten up, stop immediately, isolate and stretch the tissue passively until it releases.
Post Workout Protocols
 - **Flexibility:** complete an [entire stretch routine](#) for your hips, hamstrings, quads and calves
 - **Nutrition:** immediately consume [Recovery Fuel](#) to shorten your recovery window and replace depleted muscle sugar (making tomorrows workouts more productive).
- **Choose one of the following for your afternoon workout:**
- **Complete Racing Solutions Row: HR Intensity Intervals (65 Minutes)**
Misc. Notes: these power blocks are all about creating...power! With this being said, the first couple of intervals is going to be more difficult mentally than they are physically. The interesting aspect of power is that the generation of power is a combination of the nervous system and the muscles working in unison together – once this combination is activated, the generation of power becomes "easier". Be patient and be mentally focused on your form to avoid any potential injury (pulled muscle, tendon & ligaments).

Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces of ice cold [Energy Fuel](#) to top off both your calories and provide electrolytes for proper muscle contraction.

Warm up-HR Zone 1: Focus on a straight back and leading with your legs and finishing with your arms coming to your chest.
Display: Duration Load Level: 3 Duration: 10 Minutes Pull Rate: less than 25 Stretch from head to toe

Main Set#1: HR Power Intervals
Load Level: 8 Pull Rate: 25 plus
1 Minute holding the fastest pace you can maintain for 1 minute – be aggressive here!
2 Minutes at an easy effort (keep moving) with good form to avoid an injury.)
Repeat 10x = 30 Minutes

Transition Set: 5 minutes of easy pulling/active recovery – strive to get your HR into Z1 for the majority of this 5 minutes

Main Set#2: HR Power Intervals
Load Level: 8 Pull Rate: 25 plus
1 Minute holding the fastest pace you can maintain for 1 minute – be aggressive here!
2 Minutes at an easy effort (keep moving) with good form to avoid an injury)
Repeat 5x = 15 Minutes

Cool Down-HR Zone 1: Focus on a straight back and leading with your legs and finishing with your arms coming to your chest.
Load Level: 2 **Duration:** 10 Minutes **Pull Rate:** less than 25 **Stretch from head to toe**

▪ **Complete Racing Solutions Bike: Power Interval Workout (60 Minutes)**

Misc. Notes: the key to maximizing your productivity during this workout is to keep a close eye on your intensity levels (no higher than HR Z3); your leg turnover is going to be slow intentionally. Feel the various muscles working together to create power throughout the entire 360 pedal stroke. You want to feel your quads, hamstrings, calves and gluts all firing to turn the pedals.

Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces of ice cold [Energy Fuel](#) to top off both your calories and provide electrolytes for proper muscle contraction.

Warm up-HR Zone 1: Focus on [optimum pedal mechanics](#) right from the beginning

Duration: 10 minutes

Gearing: small chain ring up front, middle rear gearing

Cadence: 80-85 (no higher/lower)

Misc.: stretch and hydrate before moving into your main set

Main Performance Block #1: 45 minutes (HR Zone 3)

2 Minute Tall Gear Acceleration out of the saddle interval

Big chain ring up front, hardest gear in the back stand up & focus on keeping yourself from "bottoming out" at the bottom of the pedal stroke (pull back prior to hitting bottom dead center). Push your effort until you hit your upper end of HR Z3 by the end of the 2 minutes.

3 minute seated- event tempo with your cadence above 90 & at the lower end of HR Z3; focus on deep belly breathing to ride as fast as possible without driving your HR too high.

REPEAT THIS 5 MINUTE BLOCK 9 TIMES FOR A TOTAL OF 45 MINUTES

Cool Down (HR Zone 1): Keep a close eye on your HR level for the final 5 minutes

Duration: 5 minutes

Gearing: the easiest combination that allows for 85-90 cadence & HR Z1

Cadence: 85-90

Misc.: don't dismount until your heart rate is within HR Z1

▪ **(Immediately following your above workout) Complete Racing Solutions Abdominal & Lower Back Work**

Workout notes: complete each of the following exercises for **20 seconds**; your rest interval is **40 seconds** as you move to the next exercise. Go through each exercise and then repeat the entire set - total of 2 sets.
