## Tuesday

- **Body Analysis** – please use your **Coach Robb Body Analysis Spreadsheet** to log this information for evaluation purposes  
**Note:** If your heart rate is up by four or more beats over last week's average – do not train, sleep and eat instead
- **(Morning Workout) Complete Racing Solutions Combo Weight Workout: Super Slow Challenge (20% less weight)**  
**[Please use the spreadsheet and associated videos listed at the bottom of this document]**  
**Workout notes:** same exercises as you have been doing for the last three weeks with **20% less weight**. You should finish your weight workout feeling fresh (the entire idea about an active recovery week).  
**Pre-Hydration & Nutrition:** 10-15 minutes prior to this workout, consume 8-10 ounces of cold [Energy Fuel](#) to top off both your calories and provide electrolytes for proper muscle contraction.  
**Sets: 2 Repetitions: 6 minimum/8 maximum (both upper and lower body)**  
**Post Workout Protocols**
  - **Flexibility:** complete [dynamic movements](#), [static stretches](#) & foam rolling exercises for optimum recovery
  - **Nutrition:** immediately consume 8-10 ounces of [Recovery Fuel](#) to replace depleted muscle sugar & repair muscle tissue
- **(Afternoon Workout) Complete Racing Solutions MX Aerobic Workout #1**  
**[Please refer to the spreadsheet at the bottom of this document]**  
**Pre-Hydration & Nutrition:** 10-15 minutes prior to this workout, consume 8-10 ounces of cold [Energy Fuel](#) to top off both your calories and provide electrolytes for proper muscle contraction.  
**Workout Notes:** don't let the intensity levels throw you off, if you maintain 80% for 90 minutes, you will find that you have plenty of energy for the last set. Make a mental decision to NOT increase your effort (based on your heart rate) even though you will be comfortable enough to do so. Keep in mind that this workout needs to be completed within your aerobic intensity zones to ensure that you are ready for your high intensity workouts during the rest of the week.

## **Friday**

- **Body Analysis – please use your Coach Robb Body Analysis Spreadsheet to log this information for evaluation purposes**

- **Complete Rest Day**

**Misc. Notes:** most of our biggest frustrations are a result of letting the little things get by us; for example, when we allow ourselves to run behind on our morning schedule, we end up rushing around and creating more work for later: dishes in the sink, beds not made, etc. You jump in the car in a rush to "make up time" and as a result we end up using more gas, wearing our tires out faster and increase our risk of getting a ticket (for either speeding or running a red light) – which only increases the cost of our insurance. Ironically, all of these aggravations could have been alleviated if we had got up on time; however, this still isn't the actual issue. The reason why you went to bed late, which made you too tired to get up on time. The point here, is step back two or three steps with each frustration that you are dealing with to maximize your complete potential.

### ▪ **Evening Protocols**

**Nutrition:** consume 8 ounces of Energy Fuel to top off your electrolytes and hydration levels

**Foam Roller & Trigger Point Therapy:** soften the muscle and connective tissue with the foam roller & then apply TP therapy

#### Saturday

- **Body Analysis** – please use your **Coach Robb Body Analysis Spreadsheet to log this information for evaluation purposes**  
**Note: If your heart rate is up by four or more beats over last week's average – do not train, sleep and eat instead**
- **Complete Racing Solutions MX Workout (2 Hours Total)**
- **Pre-Hydration & Nutrition:** 10-15 minutes prior to this workout, consume 8-10 ounces of cold [Energy Fuel](#) to top off both your calories and provide electrolytes for proper muscle contraction.

**Workout Notes:** break your riding up into 15-minute sessions with 15 minutes rest; maintain a HR of Z3 or less for your entire time on the track. Refrain from "training", simply go ride your motorcycle – have fun railing turns or jumping. Stretch with dynamic movements prior to getting back on the bike.

#### Post Workout Protocols

- **Flexibility:** complete [dynamic movements](#), [static stretches](#) & foam rolling exercises for optimum recovery
- **Nutrition:** immediately consume 8-10 ounces of [Recovery Fuel](#) to replace depleted muscle sugar & repair muscle tissue
- **2 Hour Nap After Lunch**  
**Misc. Notes:** immediately following your lunch of high-quality greens and fruits, lie down in a dark cold room and strive to get two to three hours of sleep. This window of sleep will provide your body with the opportunity to release natural growth hormones to begin the recovery process from this morning's workout. When you wake up, immediately consume a fruit smoothie and a serving of amino acids to provide your body the building blocks necessary to repair your muscles.
- **Evening Protocols**  
**Nutrition:** consume 8 ounces of Energy Fuel to top off your electrolytes and hydration levels  
**Foam Roller & Trigger Point Therapy:** soften the muscle and connective tissue with the foam roller & then apply TP therapy  
**Diaphragmatic Breathing:** [click here](#) to strengthen you diaphragm (your breathing muscle), breath through a straw & nose closed

#### Sunday

- **Body Analysis** – please use your **Coach Robb Body Analysis Spreadsheet to log this information for evaluation purposes**

#### Post Workout Protocols

- **Flexibility:** complete [dynamic movements](#), [static stretches](#) & foam rolling exercises for optimum recovery
- **Nutrition:** immediately consume 8-10 ounces of [Recovery Fuel](#) to replace depleted muscle sugar & repair muscle tissue
- **2 Hour Nap After Lunch**  
**Misc. Notes:** research has validated that your pituitary gland releases the greatest amount of hGH which is responsible for important elements like rebuilding muscle tissue and how lean you are – the two key elements of your strength to weight ratios. To ensure that you fall asleep quickly and sleep as deep as possible, consume a lunch that contains high levels of high-quality protein & fat (they only thing that satisfies your appetite).
- **Evening Protocols**  
**Nutrition:** consume 8 ounces of Energy Fuel to top off your electrolytes and hydration levels  
**Foam Roller & Trigger Point Therapy:** soften the muscle and connective tissue with the foam roller & then apply TP therapy
