

**Training Cycle:**  
**Cycle Duration:**  
**Work Week**  
**Focus:**

**Phase 3**  
**6 Weeks**  
**2/6**  
**Enhanced Strength | Speed | Endurance**

**Intensity Note:**

- **Blue highlights indicate HR Zone 2 or less (Builds your aerobic engine – burns fat as a primary fuel source)**
- **Red highlights indicate HR Zone 3+ (Builds your strength & speed – burns stored sugar as a primary fuel source)**

**Monday**

- **Body Analysis:** please use your Coach Robb Report Card to log this information for evaluation purposes
- **Complete Rest Day**

**Misc. Notes:** if logistically possible, sleep in and don't begin your day with an alarm; instead wake up when your body is ready (Note: this may mean that you need to go to bed a little early to fit your personal schedule). Before getting out of bed, lay flat on your back and relax; focus on diaphragmic breathing and maximizing your oxygen uptake. After you become completely relaxed, I want you to get the small of your back (right above your butt) flat on your bed. If you are not able to keep your lower back flat on the bed, take some extra time and foam roll your quads, ITB and glutes. By doing this, you will improve the range of motion within your hips and legs – this will enhance your biomechanics as an athlete.

- **Evening Protocols**

**Misc. Notes:** when you lay down to go to sleep, your goal is to get to sleep as quickly as possible, sleep as deep as possible and stay there as long as possible. If your brain doesn't have enough sugar to last through the night, you will wake up – not an ideal scenario when it comes to recovering from your day of training. An additional focus of getting to sleep quickly is associated with your body's production of hGH (human growth hormone). Human growth hormone is what makes you leaner and incorporates with other hormones necessary for complete recovery from the workloads associated with your training. With this being said, consume a highly dense snack or smoothie to help satisfy your brains need for sugar (from your liver) and your muscles needs for amino acids.

**Tuesday**

- **Body Analysis:** please use your Coach Robb Report Card to log this information for evaluation purposes
- **(Morning Workout) Complete Racing Solutions MX: Aerobic Workout #1**

**[Please refer to the spreadsheet at the bottom of this document]**

**Workout Notes:** This set is going to teach you how much faster you can go when you focus on staying aerobic for 95% of your total ride time. Your last set will feel easy due to fact that you have been aerobic for the majority of your workout. Pay close attention to your heart rate to ensure that you have the energy stored to drop the hammer during set number five.

**Post Workout Protocols**

- **Flexibility:** complete an [entire stretch routine](#) for your hips, hamstrings, quads and calves
- **Nutrition:** immediately consume [Recovery Fuel](#) to shorten your recovery window and replace depleted muscle sugar (making tomorrows workouts more productive).

- **(Afternoon Workout) Complete Racing Solutions Combo Weight Workout: Muscular Endurance Phase 1**

**[Please use the spreadsheet and associated videos listed at the bottom of this document]**

**Workout notes:** come into this workout session mentally prepared to be challenged. Take extra precaution NOT to lose your form as you complete the exercises – this will only increase your chance for injury. Stretching in between exercises will help keep the muscles from cramping up and keep them performing at a maximum output level; with the shorter rep count, you will have the time.).

**Pre-Hydration & Nutrition:** 10-15 minutes prior to this workout, consume 8-10 ounces of cold [Energy Fuel](#) to top off both your calories and provide electrolytes for proper muscle contraction. Note: cold fluids absorb better than warm fluids helping hydration.

**Weight:** choose a weight that you can complete 10 reps with good form; maintain the same weight for second set

**Speed of Lift:** quick off the bottom, slow (3 count) back to your starting point

**Rep Count:**

Upper Body the goal is to complete **8-10 reps max**  
Lower Body the goal is to complete **8-10 reps max**

**Sets: 2**

**Post Workout Protocols**

- **Flexibility:** complete an [entire stretch routine](#) for your hips, hamstrings, quads, and calves
- **Nutrition:** immediately consume [Recovery Fuel](#) to shorten your recovery window and replace depleted muscle sugar (making tomorrows workouts more productive).

- **Evening Protocols:** please reference Monday's notes

## Wednesday

- **Body Analysis:** please use your Coach Robb Report Card to log this information for evaluation purposes
- **(Morning Workout) Complete Racing Solutions MX: Speed Workout #1**  
[Please refer to the spreadsheet at the bottom of this document]

**Workout Notes:** this day needs to be approached as if it was a national - food, warm up, etc. The mental side of this workout is for you to familiarize your body with what you expect from it on race day: perfect execution of all the homework you have put into your racing. With your focus being on producing the fastest laps possible, your sight lap needs to be focused and productive. Have fluids and calories (exactly what you want to consume on race day) available to maintain your blood sugar levels (to maintain mental clarity and energy) throughout the entire workout.

### Post Workout Protocols

- **Flexibility:** complete an [entire stretch routine](#) for your hips, hamstrings, quads and calves
- **Nutrition:** immediately consume [Recovery Fuel](#) to shorten your recovery window and replace depleted muscle sugar (making tomorrow's workouts more productive).

- **(Afternoon workout) Complete Racing Solutions Bike: Even Tempo (90')**

**Workout Notes:** keep a close eye on your HR throughout this ride to ensure that you are staying aerobic for maximum productivity (loosen tight muscles, get nutrients to torn down muscle tissue, etc.). Adjust your gearing to keep your leg turnover in the 80-90 range (no higher or lower to keep the accumulation of lactic acid to a minimum).

**Pre-Hydration & Nutrition:** 10-15 minutes prior to this workout, consume 8-10 ounces of cold [Energy Fuel](#) to top off both your calories and provide electrolytes for proper muscle contraction. Note: cold fluids absorb better than warm fluids helping hydration.

### Warm Up (HR Z1)

**Duration:** 10 minutes

**Cadence:** 80-85 (no higher/lower)

**Gearing:** small chain ring up front, middle rear gearing

**Misc.:** stretch and hydrate before moving into your main set

### Main Set: 70 Minutes (HR Z2)

**Set Notes:** with your cadence between 80-90; tallest gearing that you can maintain while keeping the chain tension tight and maintaining your cadence zone; every 10 minutes stand up and stretch your hamstrings, quads, calves and lower back.

### Cool Down: 10 Minutes (HR Z1)

**Duration:** 5 minutes (no shorter)

**Cadence:** 80-85 (no higher/lower)

**Gearing:** small chain ring up front, middle rear gearing

**Misc.:** Notes: stretch your lower back, calves and quads prior to dismounting

### Post Workout Protocols

- **Flexibility:** complete an [entire stretch routine](#) for your hips, hamstrings, quads and calves
- **Nutrition:** immediately consume [Recovery Fuel](#) to shorten your recovery window and replace depleted muscle sugar (making tomorrow's workouts more productive).

- **Evening Protocols:** please reference Monday's notes

#### Thursday

- **Body Analysis:** please use your Coach Robb Report Card to log this information for evaluation purposes
- **(Morning Workout) Complete Racing Solutions MX: Aerobic Workout #2**

[Please refer to the spreadsheet at the bottom of this document]

**Workout Notes:** this workout is going to assess your aerobic capacity on the track. Pay close attention to your heart rate levels throughout each 30-minute moto; if your heart rate goes beyond your 85% heart rate number, you need to slow down and smooth out on the track. Keep in mind that if you go beyond 85%, we will not have an accurate evaluation of your aerobic function on the bike. Taking the smooth lines includes smooth throttle, clutch and brake control everywhere on the track. Focus on landing on the backsides of all the jumps to keep your momentum as high as possible, with the least amount of energy.

#### Post Workout Protocols

- **Flexibility:** complete an [entire stretch routine](#) for your hips, hamstrings, quads and calves
- **Nutrition:** immediately consume [Recovery Fuel](#) to shorten your recovery window and replace depleted muscle sugar (making tomorrow's workouts more productive).

- **(Afternoon Workout) Complete Racing Solutions Combo Weight Workout: Muscular Endurance Phase 1**

[Please use the spreadsheet and associated videos listed at the bottom of this document]

**Workout notes:** come into this workout session mentally prepared to be challenged. Take extra precaution NOT to lose your form as you complete the exercises – this will only increase your chance for injury. Stretching in between exercises will help keep the muscles from cramping up and keep them performing at a maximum output level; with the shorter rep count, you will have the time.).

**Pre-Hydration & Nutrition:** 10-15 minutes prior to this workout, consume 8-10 ounces of cold [Energy Fuel](#) to top off both your calories and provide electrolytes for proper muscle contraction. Note: cold fluids absorb better than warm fluids helping hydration.

**Weight:** choose a weight that you can complete 10 reps with good form; maintain the same weight for second set

**Speed of Lift:** quick off the bottom, slow (3 count) back to your starting point

#### Rep Count:

Upper Body the goal is to complete **8-10 reps max**

Lower Body the goal is to complete **8-10 reps max**

**Sets:** 2

#### Post Workout Protocols

- **Flexibility:** complete an [entire stretch routine](#) for your hips, hamstrings, quads and calves
- **Nutrition:** immediately consume [Recovery Fuel](#) to shorten your recovery window and replace depleted muscle sugar (making tomorrow's workouts more productive).

- **Evening Protocols:** please reference Monday's notes

## Friday

- **Body Analysis** – please use your Coach Robb Report Card to log this information for evaluation purposes
- **(Morning Workout) Complete Racing Solutions MX: Speed Workout #2**

[Please refer to the spreadsheet at the bottom of this document]

**Workout Notes:** as the workout focus header implies, this workout is going to challenge you on creating opening lap speed and then being able to find the fastest lines and duplicate the speed interval after interval. Remember, it doesn't help you to go fast for one lap and then fall off pace, your goal is to create a consistent speed for as many laps as the moto is long. Due to the high level of intensity, your morning breakfast needs to be loaded with protein and carbs (pancakes, waffles, toast, etc.). Maintaining your blood sugar in between sets will improve the overall quality and outcome of the workout.

### Post Workout Protocols

- **Flexibility:** complete an [entire stretch routine](#) for your hips, hamstrings, quads and calves
- **Nutrition:** immediately consume [Recovery Fuel](#) to shorten your recovery window and replace depleted muscle sugar (making tomorrows workouts more productive).

- **(Afternoon workout) Complete Racing Solutions Bike: Even Tempo (90')**

**Workout Notes:** keep a close eye on your HR throughout this ride to ensure that you are staying aerobic for maximum productivity (loosen tight muscles, get nutrients to torn down muscle tissue, etc.). Adjust your gearing to keep your leg turnover in the 80-90 range (no higher or lower to keep the accumulation of lactic acid to a minimum).

**Pre-Hydration & Nutrition:** 10-15 minutes prior to this workout, consume 8-10 ounces of cold [Energy Fuel](#) to top off both your calories and provide electrolytes for proper muscle contraction. Note: cold fluids absorb better than warm fluids helping hydration.

### Warm Up (HR Z1)

**Duration:** 10 minutes

**Cadence:** 80-85 (no higher/lower)

**Gearing:** small chain ring up front, middle rear gearing

**Misc.:** stretch and hydrate before moving into your main set

### Main Set: 70 Minutes (HR Z2)

**Set Notes:** with your cadence between 80-90; tallest gearing that you can maintain while keeping the chain tension tight and maintaining your cadence zone; every 10 minutes stand up and stretch your hamstrings, quads, calves and lower back.

### Cool Down: 10 Minutes (HR Z1)

**Duration:** 5 minutes (no shorter)

**Cadence:** 80-85 (no higher/lower)

**Gearing:** small chain ring up front, middle rear gearing

**Misc.:** Notes: stretch your lower back, calves and quads prior to dismounting

### Post Workout Protocols

- **Flexibility:** complete an [entire stretch routine](#) for your hips, hamstrings, quads and calves
- **Nutrition:** immediately consume [Recovery Fuel](#) to shorten your recovery window and replace depleted muscle sugar (making tomorrows workouts more productive).

- **Evening Protocols:** please reference Monday's notes

## Saturday

- **Body Analysis** – please use your Coach Robb Report Card to log this information for evaluation purposes

- **(Morning Workout) Complete Racing Solutions MX Aerobic Workout - Choice**

[Please refer to the spreadsheet at the bottom of this document]

**Workout Notes:** duplicate one of your speed workouts from earlier in the week. Strive to be quicker and more consistent than you were the last time you completed the protocols.

### Post Workout Protocols

- **Flexibility:** complete an [entire stretch routine](#) for your hips, hamstrings, quads and calves
- **Nutrition:** immediately consume [Recovery Fuel](#) to shorten your recovery window and replace depleted muscle sugar (making tomorrows workouts more productive).

- **2 Hour Power Nap after lunch**

**Misc. Notes:** the growth hormones released during your nap will be your biggest asset when it comes to overall physical improvement. Try to eat a complete meal prior to your nap to enhance the quality.

- **(Afternoon Workout) Complete Racing Solutions Combo Weight Workout: Muscular Endurance Phase 1**

[Please use the spreadsheet and associated videos listed at the bottom of this document]

**Workout notes:** come into this workout session mentally prepared to be challenged. Take extra precaution NOT to lose your form as you complete the exercises – this will only increase your chance for injury. Stretching in between exercises will help keep the muscles from cramping up and keep them performing at a maximum output level; with the shorter rep count, you will have the time.).

**Pre-Hydration & Nutrition:** 10-15 minutes prior to this workout, consume 8-10 ounces of cold [Energy Fuel](#) to top off both your calories and provide electrolytes for proper muscle contraction. Note: cold fluids absorb better than warm fluids helping hydration.

**Weight:** choose a weight that you can complete 10 reps with good form; maintain the same weight for second set

**Speed of Lift:** quick off the bottom, slow (3 count) back to your starting point

### Rep Count:

Upper Body the goal is to complete **8-10 reps max**

Lower Body the goal is to complete **8-10 reps max**

**Sets:** 2

### Post Workout Protocols

- **Flexibility:** complete an [entire stretch routine](#) for your hips, hamstrings, quads and calves
- **Nutrition:** immediately consume [Recovery Fuel](#) to shorten your recovery window and replace depleted muscle sugar (making tomorrows workouts more productive).

- **Evening Protocols:** please reference Monday's notes

## Sunday

- **Body Analysis** – please use your Coach Robb Report Card to log this information for evaluation purposes
- **(Morning Workout) Complete Racing Solutions MX Speed Workout - Choice**

[Please refer to the spreadsheet at the bottom of this document]

**Workout Notes:** duplicate one of your speed workouts from earlier in the week. Strive to be quicker and more consistent than you were the last time you completed the protocols.

### Post Workout Protocols

- **Flexibility:** complete an [entire stretch routine](#) for your hips, hamstrings, quads and calves
- **Nutrition:** immediately consume [Recovery Fuel](#) to shorten your recovery window and replace depleted muscle sugar (making tomorrows workouts more productive).

- **2 Hour Nap After Mid-Day Meal**

**Misc. Notes:** immediately following your lunch of high-quality greens and fruits, lie down in a dark cold room and strive to get two to three hours of sleep. This window of sleep will provide your body with the opportunity to release natural growth hormones to begin the recovery process from this morning's workout. When you wake up, immediately consume a fruit smoothie and a serving of amino acids to provide your body the building blocks necessary to repair your muscles.

- **(Afternoon workout) Complete Racing Solutions Bike: Even Tempo (90')**

**Workout Notes:** keep a close eye on your HR throughout this ride to ensure that you are staying aerobic for maximum productivity (loosen tight muscles, get nutrients to torn down muscle tissue, etc.). Adjust your gearing to keep your leg turnover in the 80-90 range (no higher or lower to keep the accumulation of lactic acid to a minimum).

**Pre-Hydration & Nutrition:** 10-15 minutes prior to this workout, consume 8-10 ounces of cold [Energy Fuel](#) to top off both your calories and provide electrolytes for proper muscle contraction. Note: cold fluids absorb better than warm fluids helping hydration.

### Warm Up (HR Z1)

**Duration:** 10 minutes

**Cadence:** 80-85 (no higher/lower)

**Gearing:** small chain ring up front, middle rear gearing

**Misc.:** stretch and hydrate before moving into your main set

### Main Set: 70 Minutes (HR Z2)

**Set Notes:** with your cadence between 80-90; tallest gearing that you can maintain while keeping the chain tension tight and maintaining your cadence zone; every 10 minutes stand up and stretch your hamstrings, quads, calves and lower back.

### Cool Down: 10 Minutes (HR Z1)

**Duration:** 5 minutes (no shorter)

**Cadence:** 80-85 (no higher/lower)

**Gearing:** small chain ring up front, middle rear gearing

**Misc.:** Notes: stretch your lower back, calves, and quads prior to dismounting

### Post Workout Protocols

- **Flexibility:** complete an [entire stretch routine](#) for your hips, hamstrings, quads, and calves
- **Nutrition:** immediately consume [Recovery Fuel](#) to shorten your recovery window and replace depleted muscle sugar (making tomorrows workouts more productive)

- **Evening Protocols:** please reference Monday's notes

Complete Racing Solutions Aerobic MX Workout #1 <div>             Workout Focus: Aerobic Enhancement             Total Duration: 2 Hours           </div>		
	Description	
Warm Up	Set Focus: generate blood flow into all the working muscles <a href="#">Instructional Video on how to set up the Concept 2 Rower</a>	Intensity
Workout Protocol:	Concept 2™ Rower - 10 minutes: low intensity pulling <a href="#">Instructional Video on how to stretch - head to toe</a> Stretch passively (no bouncing) from head to toe	Less Than < 40%
Main Set #1	Set Focus: Reaction Time & First Turn Aggression	Intensity
Workout Protocol:	Complete 10 starts and into the first turn as aggressively as you can implement safely. Focus on control between the clutch, brake and throttle to maximize your momentum. Rest For 5 Minutes - Stretch from head to toe / Re-hydrate with <a href="#">Energy Fuel</a>	N/A
Main Set #2	Set Focus: Aerobic Enhancement / Internal Pacing	Intensity
Workout Protocol:	Complete your interval with a start and then settle into the track at a pace that you can maintain (less than a two second deviation) for 30 minutes. Note: first fifteen minutes take the optimum lines and maintain optimum momentum last fifteen minutes take the non-optimum lines & focus on belly breathing Moto Specific Heart Rate Zone - Low # High #	
Elapsed Times:	Lap 1 Time: Lap 2 Time: Lap 3 Time: Lap 4 Time: Lap 5 Time:	85-90%
Elapsed Times:	Lap 6 Time: Lap 7 Time: Lap 8 Time: Lap 9 Time: Lap 10 Time:	85-90%
	Fastest Lap Time: Average Lap Pace: Avg. Heart Rate: Max HR:	
	Rest For 5 Minutes - Stretch from head to toe / Re-hydrate with Energy Fuel	
Main Set #3	Set Focus: Reaction Time & First Turn Aggression	Intensity
Workout Protocol:	Complete 10 starts and into the first turn as aggressively as you can implement safely. Focus on control between the clutch, brake and throttle to maximize your momentum. Rest For 5 Minutes - Stretch from head to toe / Re-hydrate with Energy Fuel	N/A
Main Set #4	Focus: Aerobic Enhancement / Internal Pacing	Intensity
Workout Protocol:	Same notes as Set #2 - 30-minute straight moto with consistent lap times beginning to end.	
Elapsed Times:	Lap 1 Time: Lap 2 Time: Lap 3 Time: Lap 4 Time: Lap 5 Time:	85-90%
Elapsed Times:	Lap 6 Time: Lap 7 Time: Lap 8 Time: Lap 9 Time: Lap 10 Time:	85-90%
	Fastest Lap Time: Average Lap Pace: Avg. Heart Rate: Max HR:	
	Rest For 5 Minutes - Stretch from head to toe / Re-hydrate with Energy Fuel	
Main Set #5	Set Focus: Sprint Speed	Intensity
Workout Protocol:	Complete a start and then merge onto the track just like a race. Over the next 2 laps, hold a pace that challenges you (don't ride over your head and make an injury provoking mistake). REPEAT THIS FOUR TIMES WITH 5 MINUTE REST INTERVAL Moto Specific Heart Rate Zone - Low # High #	
Elapsed Times:	2 Lap Elapsed Time Int. #1: 2 Lap Elapsed Time Int. #2:	95-100%
Elapsed Times:	2 Lap Elapsed Time Int.#3: 2 Lap Elapsed Time Int. #4:	95-100%
	Fastest Lap Time: Average Lap Pace: Avg. Heart Rate: Max HR:	
Warm Down	10 Minutes of easy riding - nothing structured or intense (watch the HR monitor to ensure)	< 40%
	Pre-Riding Weight: Post-Riding Weight: Total Fluids Consumed: Loss/Gain	

Complete Racing Solutions MX Speed Workout #1					
Workout Focus: Opening Speed				Total Ride Time: 60 Minutes	
		Description			
Warm Up		Set Focus: Gradual Warm Up			Intensity
		Instructional Video on how to set up the Concept 2 Rower			Less Than
		Ride either a bike or Concept 2 Rower easy for 10 minutes - even tempo			50%
		Stretch passively (no bouncing) from head to toe / Re-hydrate with Energy Fuel			
Main Set #1		Set Focus: Pre-Race Routine			Intensity
Workout Protocol:		Complete 10 starts with your emphasis being on implementing your complete pre-race routine. On race day, your body will emulate what you practice so stay mentally focused & specific.			Too Short To Evaluate
		Rest For 10 Minutes - Stretch from head to toe / Re-hydrate			
Main Set #2		Set Focus: Opening Lap Speed			Intensity
Workout Protocol:		This set will emulate what a race should feel like; be mentally prepared to come to the line with the fastest and smoothest lines possible. Mentally rehearse these two laps. Consistency is the key to maximizing your productivity.			
		Moto Specific Heart Rate Zone - Low # High #

		Rest For 10 Minutes - Stretch from head to toe / Re-hydrate			
Main Set #3		Set Focus: Hold Consistent Times At An Aerobic Effort			Intensity
Workout Protocol:		Hold your pace for 30 minutes			
		Pay close attention to your heart rate; if you push too hard, you will negatively affect the next set of high-quality pacing intervals.

		Rest For 10 Minutes - Stretch from head to toe / Re-hydrate			
Main Set #4		Set Focus: Hold Consistent Times At An Aerobic Effort			Intensity
Workout Protocol:		Hold your pace for 30 minutes			
		With the residual fatigue from the last three sets, strive to be smooth everywhere to keep your heart rate as low as possible. If you do, your speed will surprise you at a low heart rate.
