Choose one of the following for your morning workout:

- **Complete Racing Solutions Bike: 3 Mile Speed Intervals**

Misc. Notes: this workout is all about tying in your intensity with your pace (given the environmental elements: wind, hills, heat & humidity); as you bring your speed up to HR Z3 mentally focus on using your gearing, cadence, pedal mechanics, and your position on the seat: when the road goes up, your butt needs to slide back on the seat).

Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces of cold [Energy Fuel](#) to top off both your calories and provide electrolytes for proper muscle contraction.

Warm Up: HR Zone 1 (Note longer warm up associated with the intensity of your main set)

Duration: 5 Miles

Cadence: 80-85 (no higher/lower)

Misc.: stretch and hydrate before moving into your main set

Repeat the following for a total of 25 Miles

3 Miles at High End of HR Zone 3: with optimized pedal mechanics, spin the tallest gear combination that you can while staying in your **HR Zone 3 & cadence of 75-80 (pedal in full circles).**

Recover by spinning easily for 2 miles (Goal is to get your HR down into **HR Z2** or lower before beginning the next interval)

Cool Down (HR Zone 1): Keep a close eye on your HR level for the final 5 minutes

Duration: 5 Miles

Gearing: the easiest combination that allows for 85-90 cadence & **HR Z1**

Cadence: 85-90

Misc.: don't dismount until your heart rate is within **HR Z1**

Workout Notes: this workout is going to acclimate your body to staying comfortable while it is working at a high level of intensity. To maximize the amount of oxygen available to your working muscles, focus on diaphragmatic breathing through your stomach and then your chest. Remember to lead with your legs for maximum power output and optimized endurance.

Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces of cold [Energy Fuel](#) to top off both your calories and provide electrolytes for proper muscle contraction.

Complete Rest Day

Mental Notes: take 10 minutes and complete these two things (5 minutes each): [Diaphragmic Breathing](#) & pressing your lower back to the floor. Repeat throughout the day as often as your schedule permits.

Diaphragmic Breathing: learning how to control your breathing and change your style of breathing: either through your chest or your belly. Belly breathing – activating the diaphragm muscle, is more effective in delivering oxygen to your working muscles.

Pressing your Lower Back: to release the tension on the muscles pulling on the top of your hip bones (which causes your lower back to sway), you need to [foam roll your quads](#) and then isolate and [stretch the quadriceps](#).

Saturday

- **Body Analysis – please use your Coach Robb Body Analysis Spreadsheet to log this information for evaluation purposes (Morning Workout) Complete Racing Solutions Bike: Fragmented Intensity Blocks (23 Miles)**

Workout Notes: to maximize the productivity of this workout, have Energy Fuel available every 15 minutes (carry with you or plant bottles along your route). During the early part of each performance block, stay within the indicated intensity levels – no matter what it takes (pace is not relevant during the early part of each block). When you begin your fast intervals, refrain from becoming “scared” of riding fast – instead focus on how efficient you are pedaling when you pick up the pace. Watch for energy robbing mechanics: choppy pedal mechanics, shoulders bobbing, looking down at your legs (versus ahead 20 yards).

Warm Up:

Duration: 1 mile Intensity Level: **HR Z1** for 2 miles – **Z2** for 3 miles
Cadence: 80 or less Gearing: small up front – middle back (low load levels)

Main Set #1 (10 Miles)

3 Miles at **HR Z3** – tallest gear combination you can maintain 85-90 cadence ranges
2 Miles at **HR Z4** – tallest gear combination you can maintain 90 plus cadence
Repeat 2 times

Transition Set (2 Miles)

Z1 for 1 mile – **Z2** for 1 mile- stretch & rehydrate as necessary

Main Set #2 (10 Miles)

3 Miles at **HR Z3** – tallest gear combination you can maintain 85-90 cadence ranges
2 Miles at **HR Z4** – tallest gear combination you can maintain 90 plus cadence
Repeat 2 times

Cool Down:

Duration: 1 mile Intensity Level: **HR Z2** for 2 miles – **Z1** for 3 miles
Cadence: 80 or less Gearing: small up front – middle back (low load levels)

Post Workout Protocols

- **Flexibility:** complete an [entire stretch routine](#) for your hips, hamstrings, quads and calves
- **Nutrition:** immediately consume [Recovery Fuel](#) to shorten your recovery window and replace depleted muscle sugar (making tomorrows workouts more productive).

- **2 Hour Nap After Mid-Day Meal**

Misc. Notes: at this point in the week, your body should be eager to catch a few extra hours of sleep. With this in mind, strive to set your personal schedule so that you can take a nap within thirty (30) minutes after your high-quality lunch/snack. Think about an infant, once fed the child doses off immediately – this is because the child has been fed a high-quality meal high in fat and protein. Your meal/snack should do the same for you. If you are not dosing off within 10 minutes of lying down, you need to let me know so that we can determine why your body won't shut down long enough for a nap.

- **Evening Protocols**

Nutrition: consume 8 ounces of cold water with fresh lemon; consume a smoothie & take your evening vitamins

- **(Morning Workout) Complete Racing Solutions Row: HR Intensity Blocks (60-70 Minutes)**
 - Workout Notes:** this workout is going to acclimate your body to staying comfortable while it is working at a high level of intensity. To maximize the amount of oxygen available to your working muscles, focus on diaphragmic breathing through your stomach and then your chest. Remember to lead with your legs for maximum power output and optimized endurance.

 - **Nutrition:** immediately consume [Recovery Fuel](#) to shorten your recovery window and replace depleted muscle sugar (making tomorrows workouts more productive).
- **2 Hour Nap After Mid-Day Meal**
 - Misc. Notes:** once you wake up from your 2–3-hour nap; take a shower or bath as warm as you can tolerate. The moist air is what causes the greatest amount of warmth within the belly of a muscle. Dry heat just causes the body to sweat, where moist heat penetrates the muscle tissue and in turn creates an environment where the muscle is more relaxed and receptive to isolation & stretching.
