Monday

- **Body Analysis** – please use your Coach Robb Body Analysis Spreadsheet to log this information for evaluation purposes.
Note: If your heart rate is up by four or more beats over last week's average – do not train, sleep, and eat instead
- **Complete Rest Day**
Misc. Notes: allowing yourself to sleep and not wake up with an alarm will decrease the amount of cortisol in your blood [Note: cortisol is a hormone that is released into the blood when the body is highly stressed and referred to within the human performance community as a fat magnet]. In addition to lowering your blood cortisol levels, waking up without an alarm helps you determine what your optimum amount of sleep is given and how your body is responding to the volume & intensity of training that you are maintaining. Remember, it is not what you do in training that makes you stronger, but rather what you do regarding your nutrition and hydration.
- **Evening Protocols**
Flexibility: take 10 minutes and focus on your legs and lower body - [click here for a complete video list](#)
Nutrition: consume 8-10 ounces of cold/filtered water; consume a raw snack/meal.

- **(Morning Workout) Complete Racing Solutions (CRS) Bike: Even Tempo/Aerobic Enhancement (30Minutes)**
Workout Notes: don't eat prior to this ride. Keep a close eye on your HR throughout this ride to ensure that you keep the intensity levels on the easy side (HR Z2 or less) for maximum productivity: burn fat and enhance your aerobic engine. To keep you mentally stimulated, play around with your gearing while staying within your HR Z2 – you may surprise yourself to find that you can adjust your gearing, increase your speed, and not increase your HR: this is free money on race day!
Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces of [Energy Fuel](#) to top off both your calories and provide electrolytes for proper muscle contraction.
Warm Up: HR Zone 1

Set Notes: with your cadence between 75-85; tallest gearing that you can maintain while keeping the chain tension tight and maintaining your cadence zone; every 10 minutes stand up and stretch your hamstrings, quads, calves, and lower back.
Warm down: (HR Zone 1)
Duration: 5 minutes (no shorter)
Cadence: 70-80 (no higher/lower)
Gearing: small chain ring up front, middle rear gearing
Misc. Notes: stretch your lower back, calves, and quads prior to dismounting

- **2 Hour Nap After Mid-Day Meal**
Misc. Notes: snacks are a key component to the quality of your nap. Mix things up with a multi-grain bagel with some almond butter and an avocado. This will give you the quality fat and protein needed to satisfy your appetite and feed your muscles for additional muscle growth.
