

Training Cycle: Cycle Duration: Ŵork Week Focus:

Phase 2 6 Weeks 2/6 Enhanced Endurance, Strength & Lactate Tolerance

Intensity Note:

- Blue highlights indicate HR Zone 2 or less (Builds your aerobic engine burns fat as a primary fuel source)
- Red highlights indicate HR Zone 3+ (Builds your strength, speed & LT burns stored sugar as a primary fuel source)

Monday

Body Analysis – please use your Coach Robb Body Analysis Spreadsheet to log this information for evaluation purposes. Choose one of the following for your morning workout:

Complete Racing Solutions Row: Incremental Pacing Intervals (5500 Meters)

Misc. Notes: complete a 500-meter interval at 90-95% effort after your warm-up; use this time as your baseline pace. Your goal is to match this pace by interval number three of each set. If you start out too hard during intervals #1 and #2, you will lose the ability to hit your goal pace during interval #3. If you feel any muscle or group of muscles tightening up, stop immediately, isolate the muscle and stretch it passively (holding the stretch for 8-10 seconds) while breathing deeply.

Warm up-HR Zone 1: Focus on a straight back and leading with your legs and finishing with your arms coming to your chest. Pull Rate: less than 25 Load Level: 3 Distance: 1000 Meters Stretch from head to toe

Baseline 500 Meter Interval: complete a 500-meter interval at 90-95% effort; 1 Minute Rest Interval Display 500 Meters – 1 Minute Rest Interval Pull Rate: 25 plus Load Level: 5 Elapsed Time:

Main Set: Pacing Pyramids

Load Level: 5 Pull Rate: 25 plus 500 Meter Baseline plus 10 seconds – Rest 1 Minute 500 Meter Baseline plus 5 seconds - Rest 1 Minute 500 Meters at Baseline Pace - Rest 1 Minute Repeat 2 Times - Strive to hold goal pace for all three intervals; hold yourself accountable here!

Cool Down-HR Zone 1: Focus on a straight back and leading with your legs and finishing with your arms coming to your chest. Distance: 1000 Meters Pull Rate: less than 25 Stretch from head to toe Load Level: 3

Complete Racing Solutions Bike: Pacing Intervals (30 Minutes)

Misc. Notes: take your most up to date heart rate spreadsheet (take last week's waking heart rate average and your maximum heart rate from your last time trial) and commit to memory (or use a black marker to write on your arm) the low & high number for your HR Zone 3. Once you are finished with your warmup, your goal is to settle into your HR Z3 (no higher or lower) and complete a 3 minute "interval". Once you settle into this intensity zone, focus on your belly breathing to maximize your oxygen uptake; this will allow you to maintain your speed while staying in your HR Z3. During your 2-minute rest interval, spin easy and allow your HR to get back into HR Z1.

Warm up-HR Zone 1: Focus on optimum pedal mechanics right from the beginning **Duration:** 10 minutes

Gearing: small chain ring up front, middle rear gearing Misc.: stretch and hydrate before moving into your main set

Main Set: Heart Rate Pyramids: 3 x 5 Minutes

Cadence: 80-85 (no higher/lower)

Settle into HR Z3 and maintain for 3minutes

Recover by spinning easy for 2 minutes in **HR Z1** (no higher for optimum recovery)

Warm Down-HR Zone 1: Keep a close eye on your HR level for the final 5 minutes

Duration: 5 minutes	
Cadence: 85-90	

Gearing: the easiest combination that allows for 85-90 cadence & HR Z1 Misc.: don't dismount until your heart rate is within HR Z1

Evening Protocols

Flexibility: take 10 minutes and focus on your legs and lower body - click here for a complete video list Nutrition: consume 8-10 ounces of cold/filtered water; consume a raw snack and meal.

Tuesday

- Body Analysis please use your Coach Robb Body Analysis Spreadsheet to log this information for evaluation purposes.
 (Morning Workout) Complete Racing Solutions Combo Weight Workout: Super Slow Challenge
- [Please use the spreadsheet and associated videos listed at the bottom of this document]

Workout notes: utilizing the same weight as last week; you will lift the weight both up and down over a four second window-four seconds up-four seconds down to your starting point. If your muscles give out prior to hitting your goal count, be finished with that set. You want to refrain from sacrificing good form to complete the set count; this will only increase your risk of injury because of the momentum. If you are too fatigued to lift anymore, simply stop and move to your next exercise.

Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces of cold <u>Energy Fuel</u> to top off both your calories and provide electrolytes for proper muscle contraction. Note: cold fluids absorb better than warm fluids helping hydration.

Sets: 2 Repetitions: 6 minimum/8 maximum (both upper and lower body) Post Workout Protocols

- Flexibility: pay close attention to areas that you may not think about stretching hips, glutes, shoulder blades, etc.
- Nutrition: immediately consume 8-10 ounces of <u>Recovery Fuel</u> to replace depleted muscle sugar & repair muscle tissue
 tocols
- **Evening Protocols**

Flexibility: take 10 minutes and focus on your legs and lower body - <u>click here for a complete video list</u> Nutrition: consume 8-10 ounces of cold/filtered water; consume a raw snack and meal.

Wednesday

- Body Analysis please use your Coach Robb Body Analysis Spreadsheet to log this information for evaluation purposes. Choose one of the following for your morning workout:
 - Complete Racing Solutions Row: Incremental Pacing Intervals (6000 Meters)

Misc. Notes: pull your up-to-date heart rate zones specific to the rower; you will need your specific numbers for HR Z2 and Z3 easily visible for quick reference and maximum productivity.

Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces of cold <u>Energy Fuel</u> to top off both your calories and provide electrolytes for proper muscle contraction. Note: cold fluids absorb better than warm fluids, helping hydration.

 Warm up-HR Zone 1: Focus on a straight back and leading with your legs and finishing with your arms coming to your chest.

 Display: Distance
 Load Level: 3
 Distance: 1000 Meters
 Pull Rate: less than 25
 Stretch from head to toe

Main Set: Pacing Pyramids

Load Level: 5 Pull Rate: 25 plus

1000 Meter at low end of HR Z2 (no rest right into the next 1000 meters)

1000 Meter at high end of HR Z2 (no rest right into the next 1000 meters)

1000 Meter at low end of HR Z3 (no rest right into the next 1000 meters)

1000 Meter at high end of HR Z3 (no rest right into your cool down)

Cool Down-HR Zone 1: Focus on a straight back and leading with your legs and finishing with your arms coming to your chest.Load Level: 3Distance: 1000 MetersPull Rate: less than 25Stretch from head to toe

Complete Racing Solutions Bike: Heart Rate Pyramid Workout (30 Minutes)

Misc. Notes: you will need your HR numbers for Zone 3 and Zone 4. During your main set you will begin at your low end of HR Z3 and every 3 minutes you will increase your intensity/effort by 5 beats and then hold for 3 minutes; continue going up the pyramid until you hit the upper range of HR Z3 (no higher). After you reach the high end of HR Z3, then walk back down the pyramid 5 beats at a time for 3-minute durations (the exact opposite you did walking up the pyramid).

WARNING: IF YOU PUSH TOO HARD TOO SOON, YOU WILL NOT BE ABLE TO COME BACK DOWN THE PYRAMID CORRECTLY.

Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces of cold <u>Energy Fuel</u> to top off both your calories and provide electrolytes for proper muscle contraction. Note: cold fluids absorb better than warm fluids helping hydration.

Warm up-HR Zone 1: Focus on optimum pedal mechanics right from the beginning

Duration: 5 minutesGearing: small chain ring up front, middle rear gearingCadence: 80-85 (no higher/lower)Misc.: stretch and hydrate before moving into your main set

Main Set: Heart Rate Pyramids: 20 Minutes

Notes: beginning at the lower end of HR Z3 hold for 3 minutes; then bump up your intensity to the high end of HR Z3 & hold for 2 minutes.

Recover for 5 minutes – HR Z2 (no higher for maximum productivity) **Repeat – 20 minutes total**

Warm Down (HR Zone 1): Keep a close eye on your HR level for the final 5 minutes.

Duration: 5 minutes Cadence: 85-90

Gearing: the easiest combination that allows for 85-90 cadence & HR Z1 Misc.: don't dismount until your heart rate is within HR Z1

- **Post Workout Protocols**
 - Flexibility: pay close attention to areas that you may not think about stretching hips, glutes, shoulder blades, etc.
 - Nutrition: immediately consume 8-10 ounces of Recovery Fuel to replace depleted muscle sugar & repair muscle tissue

Evening Protocols

- Flexibility: take 10 minutes and focus on your legs and lower body click here for a complete video list
- Nutrition: consume 8-10 ounces of cold/filtered water; consume a raw snack and meal.

Thursday

Body Analysis – please use your Coach Robb Body Analysis Spreadsheet to log this information for evaluation purposes.

(Morning Workout) Complete Racing Solutions Combo Weight Workout: Super Slow Challenge

[Please use the spreadsheet and associated videos listed at the bottom of this document] Workout notes: utilizing the same weight as last week; you will lift the weight both up and down over a four second window-four

seconds up-four seconds down to your starting point. If your muscles give out prior to hitting your goal count, be finished with that set. You want to refrain from sacrificing good form to complete the set count; this will only increase your risk of injury because of the momentum. If you are too fatigued to lift anymore, simply stop and move to your next exercise.

Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces of cold Energy Fuel to top off both your calories and provide electrolytes for proper muscle contraction. Note: cold fluids absorb better than warm fluids helping hydration.

Sets: 2 Repetitions: 6 minimum/8 maximum (both upper and lower body) **Post Workout Protocols**

- - Flexibility: pay close attention to areas that you may not think about stretching hips, glutes, shoulder blades, etc. Nutrition: immediately consume 8-10 ounces of Recovery Fuel to replace depleted muscle sugar & repair muscle tissue

Evening Protocols

Flexibility: take 10 minutes and focus on your legs and lower body - click here for a complete video list Nutrition: consume 8-10 ounces of cold/filtered water; consume a raw snack and meal.

Friday

Body Analysis – please use your Coach Robb Body Analysis Spreadsheet to log this information for evaluation purposes.

Complete Rest Day

Misc. Notes Take a few extra minutes each day this week and stretch your hips, guads and hamstrings. To facilitate your stretching efforts, roll each muscle group with a foam roller. The foam roller will create vasodilation of the blood vessels within the muscle tissue which will bring fresh oxygen plus any specialized cells such as leucocytes - white blood cells that kill any germs in your system; this avoids any downtime associated with an energy robbing virus. There are five different types of leukocytes, but they are all produced and derived from a multi-potent cell in the bone marrow known as hematopoietic stem cell. Also, by evaluating your resting heart rate every morning, you can identify when your body is under attack from a virus (this will be represented in the form of an elevated heart rate and an unusual drop in body weight).

Evening Protocols

Flexibility: take 10 minutes and focus on your legs and lower body - click here for a complete video list Nutrition: consume 8-10 ounces of cold/filtered water; consume a raw snack and meal.

Saturday

- Body Analysis please use your Coach Robb Body Analysis Spreadsheet to log this information for evaluation purposes.
- (Morning Workout) Complete Racing Solutions MX: Speed Workout #1
- [Please refer to the spreadsheet at the bottom of this document]

Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces of cold <u>Energy Fuel</u> to top off both your calories and provide electrolytes for proper muscle contraction. Note: cold fluids absorb better than warm fluids helping hydration.

Workout Notes: Like all of your workouts, the heart rate monitor needs to be easily visible to maximize your productivity on the track. As we have discussed previously, the more times you work smart NOT hard on the track (i.e., bouncing off of the faces of everything) the faster and more consistent your lap times will become. Though you may not realize this, workouts like this are intended to create a "memory" within your body and muscles what it "feels" to be fast, smooth and in total control. If you feel like you are not in control - do NOT slow down. Instead focus on breathing deep FIRST to bring the heart rate down (which will make the speed feel easy).

Post Workout Protocols

- Flexibility: pay close attention to areas that you may not think about stretching hips, glutes, shoulder blades, etc.
- Nutrition: immediately consume 8-10 ounces of <u>Recovery Fuel</u> to replace depleted muscle sugar & repair muscle tissue
 2 Hour Nap After Mid-Day Meal
- 2 Hour Nap After Mid-Day Meai
 Mice Notes immediately follow

Misc. Notes: immediately following your lunch of high-quality greens and fruits, lie down in a dark cold room and strive to get two to three hours of sleep. This window of sleep will provide your body with the opportunity to release natural growth hormones to begin the recovery process from this morning's workout. When you wake up, immediately consume a fruit smoothie and a serving of amino acids to provide your body with the building blocks necessary to repair your muscles.

 (Afternoon Workout) Complete Racing Solutions Bike: 1 Mile Sprint Intervals Note: if you rode this morning, skip this cardio session.

Workout Notes: to maximize your productivity, err on the side of easy for the 1-mile seated interval (HR Z2 should feel very comfortable). This will allow you the gap of maximum effort and speed for the 1-mile interval. During the interval, focus on optimized pedal mechanics to activate and engage all the muscles that are available to facilitate riding fast (quads, gluts, calves, inner thighs, hips, lower back, core, etc.).

Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces of cold <u>Energy Fuel</u> to top off both your calories and provide electrolytes for proper muscle contraction. Note: cold fluids absorb better than warm fluids, helping hydration.

Warm up (HR Zone 1)

Duration: 2 miles **Cadence:** 80-85 (no higher/lower) **Gearing:** small chain ring up front, middle rear gearing **Stretches:** dismount & <u>stretch your lower body</u>

Main Performance Block: 10 Miles

1-mile (seated) HR Zone 2: with your cadence between 70-80 & the tallest gearing combination that you push while staying within HR Zone 2, cover 1 mile as efficiently as possible.

1-mile (seated) No HR Limitations: capture the elapsed time it takes you to complete 1 mile interval as fast as you can; after you complete 1 mile, reduce the load levels and spin easy for 1 mile (1:1 Work to Rest Ratio). **REPEAT 5X FOR A TOTAL OF 10 MILES**

Elapsed Time Interval #1: Elapsed Time Interval #2: Elapsed Time Interval #3 Elapsed Time Interval #4:

Duration: 2 Miles (no shorter)

Cadence: 70-80 (no higher/lower)

Warm down (HR Zone 2 or less)

Ending HR: Ending HR: Ending HR: Ending HR:

Gearing: small chain ring up front, middle rear gearing

Evening Protocols

Flexibility: take 10 minutes and focus on your legs and lower body - <u>click here for a complete video list</u> Nutrition: consume 8-10 ounces of cold/filtered water; consume a raw snack and meal.

Sunday

- Body Analysis please use your Coach Robb Body Analysis Spreadsheet to log this information for evaluation purposes.
- (Morning Workout) Complete Racing Solutions MX: Aerobic Workout #1
- [Please refer to the spreadsheet at the bottom of this document]

Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces of cold <u>Energy Fuel</u> to top off both your calories and provide electrolytes for proper muscle contraction. Note: cold fluids absorb better than warm fluids helping hydration.

Workout Notes: This set will challenge the balance component of your program. If you can't transition from on the gas to the brakes quickly - this set will frustrate you. Relax and stay mentally focused on each set's main focus. Keep in mind that there are two races: to the first turn and then from the first turn to the finish line. Practice balanced starts so that you don't have to think, just simply perform!

2 Hour Nap After Mid-Day Meal

Miss. Notes: research has validated that your pituitary gland releases the greatest amount of hGH which is responsible for important elements like rebuilding muscle tissue and how lean you are – the two key elements of your strength to weight ratios. To ensure that you fall asleep quickly and sleep as deeply as possible, consume a lunch that contains high levels of high-quality protein & fat (they only thing that satisfies your appetite).

(Afternoon Workout) Complete Racing Solutions Row: 5 Minute Distance Challenge (40 Minutes)

Note: if you rode this morning, skip this cardio session.

Misc. Notes: pull your up-to-date heart rate zones specific to the rower; you will need your specific numbers for HR Z2 easily visible for quick reference and maximum productivity.

Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces of cold <u>Energy Fuel</u> to top off both your calories and provide electrolytes for proper muscle contraction. Note: cold fluids absorb better than warm fluids, helping hydration.

Warm up-HR Zone 1: Focus on a straight back and leading with your legs and finishing with your arms coming to your chest.Display: DistanceLoad Level: 3Duration: 5 MinutesPull Rate: less than 25Stretch from head to toe

Main Set: Distance Challenge

Load Level: 5 Pull Rate: 25 plus 5 Minutes – Distance Covered at the upper end of HR Z2 Rest 5 Minutes – HR Z1 (no higher for maximum productivity) Repeat 3 Times

Distance Covered Interval #1: Distance Covered Interval #2: Distance Covered Interval #3:

Cool Down-HR Zone 1: Focus on a straight back and leading with your legs and finishing with your arms coming to your chest.Load Level: 3Duration: 5 MinutesPull Rate: less than 25Stretch from head to toePost Workout ProtocolsStretch from head to toe

- Flexibility: pay close attention to areas that you may not think about stretching hips, glutes, shoulder blades, etc.
- Nutrition: immediately consume 8-10 ounces of <u>Recovery Fuel</u> to replace depleted muscle sugar & repair muscle tissue
 Evening Protocols

Flexibility: take 10 minutes and focus on your legs and lower body - <u>click here for a complete video list</u> **Nutrition:** consume 8-10 ounces of cold/filtered water; consume a raw snack and meal.

Complete Racing Solutions MX		
Speed Workout #1	Workout Focus: Late Moto Speed Total Ride Time: 60 Minutes	
π.	Description	1
Warm Up	Set Focus: Gradual Warm Up	Intensity
	Instructional Video on how to set up the Concept 2 Rower	Less Than
	Ride either a bike or Concept 2 Rower easy for 10 minutes - even tempo	50%
	Instructional Video on how to stretch - head to toe	
	Stretch passively (no bouncing) from head to toe / Re-hydrate with Energy Fuel as needed	
Main Set #1	Set Focus: Pre-Race Routine	Intensity
Workout Protocol:	Complete 10 starts with your emphasis being on implementing your complete pre-race routine. On race day, your body will emulate what you practice so stay mentally focused & specific.	
	This will eliminate race day confusion-what you want from your start & what you have practiced. Moto Specific Heart Rate Zone - Low # High #
