

**Training Cycle:**  
**Cycle Duration:**  
**Work Week**  
**Focus:**

**Phase 2**  
**8 Weeks**  
**3/8**  
**Enhanced Endurance, Strength & Lactate Tolerance**

**Intensity Note:**

- **Blue highlights indicate HR Zone 2 or less (Builds your aerobic engine – burns fat as a primary fuel source)**
- **Red highlights indicate HR Zone 3+ (Builds your strength, speed & LT – burns stored sugar as a primary fuel source)**

**Monday**

- **Body Analysis – please use your Coach Robb Body Analysis Spreadsheet to log this information for evaluation purposes**  
**Choose one of the following for your morning & evening workout:**

- **Complete Racing Solutions Row: 1K Pacing Intervals (6,500-7,000 Meters)**

**Misc. Notes:** this combo set is going to push the upper end of your aerobic engine; pay close attention to your heart rate to ensure that you don't become anaerobic during the main set. During your intervals, lead with your legs and then follow up with a strong pull through. During these intervals, you should "feel" your legs pushing and your lats & back finishing the power curve (not your biceps).

**Pre-Hydration & Nutrition:** 10-15 minutes prior to this workout, consume 8-10 ounces of cold [Energy Fuel](#) to top off both your calories and provide electrolytes for proper muscle contraction.

**Warm up-HR Zone 1:** Focus on a straight back and leading with your legs and finishing with your arms coming to your chest.

**Load Level: 3**      **Distance:** 1000 Meters      **Pull Rate:** less than 25      **Stretch from head to toe**

**Baseline 1000 Meter Interval: complete a 1000-meter interval at 80-85% effort; 2 Minute Rest Interval**

**Display Setting: Distance**

**Load Level: 5**      **Pull Rate:** 25-30

**Elapsed Time:**

**Main Set#1:**

**Take your Baseline Time and add 10 seconds for your 1000 pace– 500 Meter Rest Interval**

**Load Level: 5**      **Pull Rate: 25 -30**

Elapsed Time for Interval #1 – 1000 Meters:

Elapsed Time for Interval #2 – 1000 Meters:

Elapsed Time for Interval #3 – 1000 Meters:

Elapsed Time for Interval #4 – 1000 Meters:

Strive to hold a consistent pace for all three intervals; hold yourself accountable here!

**Main Set#2: 30" Sprint – 30" Recovery**

**Load Level: 5**      **Pull Rate: 25 -30**

Repeat 15x – 30 second sprint – 30 second recovery

**Misc. Notes:** lead with your legs and a tight core to distribute the load to your legs, back and your shoulders

**Cool Down-HR Zone 1:** Focus on a straight back and leading with your legs and finishing with your arms coming to your chest.

**Load Level: 2**      **Distance:** 500 Meters      **Pull Rate:** less than 25      **Stretch from head to toe**

- **Complete Racing Solutions Bike: Pacing Intervals (34 Minutes)**

**Misc. Notes:** Once you are finished with your warm-up, your goal is to settle into your HR Z3 (no higher or lower) and complete a 3 minute "interval". Once you settle into this intensity zone, focus on your belly breathing to maximize your oxygen uptake; this will allow you to maintain your speed while staying in your HR Z3. During your 3-minute rest interval, spin easy and allow your HR to get back into HR Z1.

**Pre-Hydration & Nutrition:** 10-15 minutes prior to this workout, consume 8-10 ounces of cold [Energy Fuel](#) to top off both your calories and provide electrolytes for proper muscle contraction.

**Warm up-HR Zone 1:** Focus on [optimum pedal mechanics](#) right from the beginning

**Duration:** 5 minutes

**Gearing:** small chain ring up front, middle rear gearing

**Cadence:** 80-85 (no higher/lower)

**Misc.:** stretch and hydrate before moving into your main set

**Main Set: Heart Rate Pyramids: 4 x 6 Minutes**

Settle into **HR Z3** and maintain for 3 minutes (Note: the interval doesn't begin until you hit HR Z3, so get there quickly)

Recover by spinning easy for 3 minutes in **HR Z1** (no higher for optimum recovery)

**Cool Down-HR Zone 1: Keep a close eye on your HR level for the final 2 minutes**

**Duration:** 5 minutes

**Gearing:** the easiest combination that allows for 85-90 cadence & HR Z1

**Cadence:** 85-90

**Misc.:** don't dismount until your heart rate is within HR Z1

- **(Immediately following your above workout) Complete Racing Solutions Abdominal & Lower Back Work**

**Workout notes:** complete each of the following exercises for 30 seconds with perfect form; your rest interval is 30 seconds as you move to the next exercise. Go through each exercise and then repeat the entire set - total of 2 sets.

**Push Up-Knee to Shoulder:** [how to video](#)

**Abdominal Chris Cross:** [how to video](#)

**Abdominal Open Rotation:** [how to video](#)

**Ab Hip Risers:** [how to video](#)

## Tuesday

- **Body Analysis** – please use your Coach Robb Body Analysis Spreadsheet to log this information for evaluation purposes
- **(Morning Workout) Complete Racing Solutions Combo Weight Workout: Super Slow Challenge**

[Please use the spreadsheet and associated videos listed at the bottom of this document]

**Workout notes:** utilizing the same weight as last week; you will lift the weight both up and down over a four second window-four seconds up-four seconds down to your starting point. If your muscles give out prior to hitting your goal count, be finished with that set. You want to refrain from sacrificing good form to complete the set count; this will only increase your risk of injury because of the momentum. If you are too fatigued to lift anymore, simply stop and move to your next exercise.

**Pre-Hydration & Nutrition:** 10-15 minutes prior to this workout, consume 8-10 ounces of cold [Energy Fuel](#) to top off both your calories and provide electrolytes for proper muscle contraction.

**Sets: 2 Repetitions: 6 minimum/8 maximum (both upper and lower body)**

### Post Workout Protocols

- **Flexibility:** complete an [entire stretch routine](#) for your hips, hamstrings, quads, and calves
- **Nutrition:** immediately consume [Recovery Fuel](#) to shorten your recovery window and replace depleted muscle sugar (making tomorrow's workouts more productive).

- **Evening Protocols – Contrast Therapy**

**Misc. Notes:** if logistically possible complete a few sessions of hot/cold water therapy to facilitate recovery:

**Cold (not freezing):** 10-minute soak (pool would be ideal – up to your neck)

**Warm (not too hot):** 10-minute soak (jacuzzi would be ideal – up to your neck)

**Repeat 2 to 3 times – Consume 10-12 ounces of ice-cold water immediately following.**

## Wednesday

- **Body Analysis** – please use your Coach Robb Body Analysis Spreadsheet to log this information for evaluation purposes
- **Choose one of the following for your morning workout:**
- **Complete Racing Solutions Row: HR Intensity Intervals (40 Minutes)**

**Misc. Notes:** these intensity blocks are going to challenge you in two ways. First, you will be maintaining the same load levels but are going to be toggling between two intensity zones. Second, the duration is long enough to become distracted. By completing a 1:1 ratio between two HR zones, you will push your aerobic engine to new levels (if you don't go too hard initially and blow up); Note, you will need your specific numbers for HR Z2 and Z3 easily visible for quick reference and maximum productivity.

**Pre-Hydration & Nutrition:** 10-15 minutes prior to this workout, consume 8-10 ounces of cold [Energy Fuel](#) to top off both your calories and provide electrolytes for proper muscle contraction.

**Warm up-HR Zone 1:** Focus on a straight back and leading with your legs and finishing with your arms coming to your chest.

**Display: Distance Load Level: 3 Distance: 500 Meters Pull Rate: less than 25 Stretch from head to toe**

### Main Set: HR Pacing Intervals

**Load Level: 5 Pull Rate: 25 or less in HR Z2 – 25 plus in HR Z3**

5 Minutes at high end of HR Z2 (no rest right into the next intensity & duration block)

5 Minutes at low end of HR Z3 (no rest right into the next intensity & duration block)

**Repeat 3x = 30 Minutes**

**Cool Down-HR Zone 1:** Focus on a straight back and leading with your legs and finishing with your arms coming to your chest.

**Load Level: 3 Distance: 500 Meters Pull Rate: less than 25 Stretch from head to toe**

- **Complete Racing Solutions Bike: Power Interval Workout (30 Minutes)**

**Misc. Notes:** the key to maximizing your productivity during this workout is to keep a close eye on your intensity levels (no higher than HR Z3); your leg turnover is going to be slow intentionally. Feel the various muscles working together to create power throughout the entire 360 pedal stroke. You want to feel your quads, hamstrings, calves, and gluts all firing to turn the pedals.

**Pre-Hydration & Nutrition:** 10-15 minutes prior to this workout, consume 8-10 ounces of cold [Energy Fuel](#) to top off both your calories and provide electrolytes for proper muscle contraction.

**Warm up-HR Zone 1:** Focus on [optimum pedal mechanics](#) right from the beginning

**Duration:** 5 minutes

**Gearing:** small chain ring up front, middle rear gearing

**Cadence:** 80-85 (no higher/lower)

**Misc.:** stretch and hydrate before moving into your main set

### Main Performance Block #1: 20 minutes (HR Zone 3)

**3-minute seated- event tempo** with your cadence above 90 & within HR Z3 focus on deep belly breathing to ride as fast as possible without tripping above HR Z3. Hydrate and stretch as necessary to maintain optimum power output.

### 2-Minute-Tall Gear-Out of the saddle interval

Big chain ring up front, hardest gear in the back stand up & focus on keeping yourself from "bottoming out" at the bottom of the pedal stroke (pull back prior to hitting bottom dead center).

**REPEAT THIS 5 MINUTE BLOCK 4 TIMES FOR A TOTAL OF 20 MINUTES**

**Cool Down (HR Zone 1): Keep a close eye on your HR level for the final 5 minutes.**

**Duration:** 5 minutes

**Cadence:** 85-90

**Gearing:** the easiest combination that allows for 85-90 cadence & HR Z1

**Misc.:** don't dismount until your heart rate is within HR Z1

- **(Immediately following your above workout) Complete Racing Solutions Abdominal & Lower Back Work**

**Workout notes:** complete each of the following exercises for 30 seconds with perfect form; your rest interval is 30 seconds as you move to the next exercise. Go through each exercise and then repeat the entire set - total of 2 sets.

**Push Up-Knee to Shoulder:** [how to video](#)

**Abdominal Criss Cross:** [how to video](#)

**Abdominal Open Rotation:** [how to video](#)

**Ab Hip Risers:** [how to video](#)

- **Evening Protocols – Contrast Therapy**

**Misc. Notes:** if logistically possible complete a few sessions of hot/cold water therapy to facilitate recovery:

**Cold (not freezing):** 10-minute soak (pool would be ideal – up to your neck)

**Warm (not too hot):** 10-minute soak (jacuzzi would be ideal – up to your neck)

**Repeat 2 to 3 times – Consume 10-12 ounces of ice-cold water immediately following.**

#### Thursday

- **Body Analysis – please use your Coach Robb Body Analysis Spreadsheet to log this information for evaluation purposes**

- **(Morning Workout) Complete Racing Solutions MX Speed Workout #2**

**Pre-Hydration & Nutrition:** 10-15 minutes prior to this workout, consume 8-10 ounces of cold [Energy Fuel](#) to top off both your calories and provide electrolytes for proper muscle contraction.

**Workout Notes:** to keep you mentally focused, you will need to focus on maintaining your speed and consistency from set to set. This workout is going to break the problem that most racers experience - getting slower as the race transpires. This set is going to hold you accountable on three levels: lap times, average heart rate and a tight rest interval. Due to the intensity levels and duration of this set, it is imperative that you come to this workout well hydrated and fed.

**Post Workout Protocols**

- **Flexibility:** complete [dynamic movements](#), [static stretches](#) & foam rolling exercises for optimum recovery

- **Nutrition:** immediately consume 8-10 ounces of [Recovery Fuel](#) to replace depleted muscle sugar & repair muscle tissue

- **(Afternoon Workout) Complete Racing Solutions Combo Weight Workout: Super Slow Challenge**

**[Please use the spreadsheet and associated videos listed at the bottom of this document]**

**Workout notes:** utilizing the same weight as last week; you will lift the weight both up and down over a four second window-four seconds up-four seconds down to your starting point. If your muscles give out prior to hitting your goal count, be finished with that set. You want to refrain from sacrificing good form to complete the set count; this will only increase your risk of injury because of the momentum. If you are too fatigued to lift anymore, simply stop and move to your next exercise.

**Pre-Hydration & Nutrition:** 10-15 minutes prior to this workout, consume 8-10 ounces of cold [Energy Fuel](#) to top off both your calories and provide electrolytes for proper muscle contraction.

**Sets: 2 Repetitions: 6 minimum/8 maximum (both upper and lower body)**

**Post Workout Protocols**

- **Flexibility:** complete an [entire stretch routine](#) for your hips, hamstrings, quads, and calves

- **Nutrition:** immediately consume [Recovery Fuel](#) to shorten your recovery window and replace depleted muscle sugar (making tomorrow's workouts more productive).

- **Evening Protocols – Contrast Therapy**

**Misc. Notes:** if logistically possible complete a few sessions of hot/cold water therapy to facilitate recovery:

**Cold (not freezing):** 10-minute soak (pool would be ideal – up to your neck)

**Warm (not too hot):** 10-minute soak (jacuzzi would be ideal – up to your neck)

**Repeat 2 to 3 times – Consume 10-12 ounces of ice-cold water immediately following.**

#### Friday

- **Body Analysis – please use your Coach Robb Body Analysis Spreadsheet to log this information for evaluation purposes**

- **Complete Rest Day**

**Misc. Notes** use this day as the ultimate opportunity to prepare for upcoming events: social occasions, personal time, working out, work projects, etc. When it comes to productivity, we get 100% more out of our efforts when we are doing exactly what we have on our schedule and are adhering to the schedule. With this in mind, allocate adequate time to complete the tasks that you want/need to complete. If you only allocate 20 minutes to prepare, consume and clean up breakfast, you will find yourself rushing and/or frustrated because you literally run out of time to "get it all in on time". Though this may sound odd, time how long it takes for you to complete tasks that you complete on daily and/or weekly basis. After a week of copious note taking, you can establish your schedule for next week more accurately and with fewer frustrations because your completion and productivity rate will both be high.

- **Evening Protocols – Contrast Therapy**

**Misc. Notes:** if logistically possible complete a few sessions of hot/cold water therapy to facilitate recovery:

**Cold (not freezing):** 10-minute soak (pool would be ideal – up to your neck)

**Warm (not too hot):** 10-minute soak (jacuzzi would be ideal – up to your neck)

**Repeat 2 to 3 times – Consume 10-12 ounces of ice-cold water immediately following.**

## Saturday

- **Body Analysis** – please use your **Coach Robb Body Analysis Spreadsheet** to log this information for evaluation purposes
- **(Morning Workout) Complete Racing Solutions Bike: Fragmented Power Intervals (30 Minutes)**

**Workout Notes:** this workout will sneak up on you by the end of the workout because of the residual fatigue that “builds” throughout this workout. Keep in mind that you are asking your muscles to generate power as they begin to fatigue. The generation of power is a unique combination of mental and physical ability. When you mentally establish a threshold of speed that you want to obtain, the muscles have a threshold to surpass which requires a certain level of output – specific to the gear load levels. By hitting a goal number, you will learn to associate the intensity (as indicated by your heart rate monitor) levels needed to create speed and power. By completing intervals of the same power will improve your muscular endurance as well.

**Pre-Hydration & Nutrition:** 10-15 minutes prior to this workout, consume 8-10 ounces of cold [Energy Fuel](#) to top off both your calories and provide electrolytes for proper muscle contraction.

**Warm up-HR Zone 1:** Focus on [optimum pedal mechanics](#) right from the beginning

**Duration:** 5 minutes

**Gearing:** small chain ring up front, middle rear gearing

**Cadence:** 80-85 (no higher/lower)

**Misc.:** stretch and hydrate before moving into your main set

**Power Block #1: 20 minutes (HR Zone 3) – Hit the same rate of speed for each interval.**

**Repeat the following for the next 20 minutes (Remember the focus: hit the same speed for each interval)**

**2 Minutes:** initially out of the saddle for 30” and then into a seated position for 90” holding the tallest gear combination than you can maintain a 50-60 range-capture the average speed during the 90 seconds interval. Maintain a smooth pedal stroke for the entire interval.

At the end of the interval, go into a very easy gear combination and maintain for **2 Minutes.**

**Repeat the 2-minute “on” / 2 minute “off” until 20 minutes has transpired (please don’t surpass)**

**Cool Down (HR Zone 1): Keep a close eye on your HR level for the final 5 minutes.**

**Duration:** 5 minutes

**Gearing:** the easiest combination that allows for 85-90 cadence & HR Z1

**Cadence:** 85-90

**Misc.:** don’t dismount until your heart rate is within HR Z1

- **(Immediately following your bike workout) Complete Racing Solutions Abdominal & Lower Back Work**

**Workout notes:** complete each of the following exercises for 30 seconds with perfect form; your rest interval is 30 seconds as you move to the next exercise. Go through each exercise and then repeat the entire set - total of 2 sets.

**Push Up-Knee to Shoulder:** [how to video](#)

**Abdominal Criss Cross:** [how to video](#)

**Abdominal Open Rotation:** [how to video](#)

**Ab Hip Risers:** [how to video](#)

**Post Workout Protocols**

- **Flexibility:** complete [dynamic movements](#), [static stretches](#) & foam rolling exercises for optimum recovery
- **Nutrition:** immediately consume 8-10 ounces of [Recovery Fuel](#) to replace depleted muscle sugar & repair muscle tissue

- **2 Hour Nap After Mid-Day Meal**

**Misc. Notes:** immediately following your lunch of high-quality greens and fruits, lie down in a dark cold room and strive to get two to three hours of sleep. This window of sleep will provide your body with the opportunity to release natural growth hormones to begin the recovery process from this morning’s workout. When you wake up, immediately consume a fruit smoothie and a serving of amino acids to provide your body the building blocks necessary to repair your muscles.

- **Evening Protocols – Contrast Therapy**

**Misc. Notes:** if logistically possible complete a few sessions of hot/cold water therapy to facilitate recovery:

**Cold (not freezing):** 10-minute soak (pool would be ideal – up to your neck)

**Warm (not too hot):** 10-minute soak (jacuzzi would be ideal – up to your neck)

**Repeat 2 to 3 times – Consume 10-12 ounces of ice-cold water immediately following.**

## Sunday

- **Body Analysis – please use your Coach Robb Body Analysis Spreadsheet to log this information for evaluation purposes**  
**Choose one of the following for your morning workout:**

- **Complete Racing Solutions Row: HR Intensity Intervals (40 Minutes)**

**Misc. Notes:** these intensity blocks are going to challenge you in two ways. First, you will be maintaining the same load levels but are going to be toggling between two intensity zones. Second, the duration is long enough to become distracted. By completing a 1:1 ratio between two HR zones, you will push your aerobic engine to new levels (if you don't go too hard initially and blow up); Note, you will need your specific numbers for HR Z2 and Z3 easily visible for quick reference and maximum productivity.

**Pre-Hydration & Nutrition:** 10-15 minutes prior to this workout, consume 8-10 ounces of cold [Energy Fuel](#) to top off both your calories and provide electrolytes for proper muscle contraction.

**Warm up-HR Zone 1:** Focus on a straight back and leading with your legs and finishing with your arms coming to your chest.

**Display: Distance Load Level: 3 Distance: 500 Meters Pull Rate: less than 25 Stretch from head to toe**

**Main Set: HR Pacing Intervals**

**Load Level: 5 Pull Rate: 25 or less in HR Z2 – 25 plus in HR Z3**

5 Minutes at high end of HR Z2 (no rest right into the next intensity & duration block)

5 Minutes at low end of HR Z3 (no rest right into the next intensity & duration block)

**Repeat 3x = 30 Minutes**

**Cool Down-HR Zone 1:** Focus on a straight back and leading with your legs and finishing with your arms coming to your chest.

**Load Level: 3 Distance: 500 Meters Pull Rate: less than 25 Stretch from head to toe**

- **Complete Racing Solutions Bike: Power Interval Workout (30 Minutes)**

**Misc. Notes:** the key to maximizing your productivity during this workout is to keep a close eye on your intensity levels (no higher than HR Z3); your leg turnover is going to be slow intentionally. Feel the various muscles working together to create power throughout the entire 360 pedal stroke. You want to feel your quads, hamstrings, calves, and gluts all firing to turn the pedals.

**Pre-Hydration & Nutrition:** 10-15 minutes prior to this workout, consume 8-10 ounces of cold [Energy Fuel](#) to top off both your calories and provide electrolytes for proper muscle contraction.

**Warm up-HR Zone 1:** Focus on [optimum pedal mechanics](#) right from the beginning

**Duration:** 5 minutes

**Gearing:** small chain ring up front, middle rear gearing

**Cadence:** 80-85 (no higher/lower)

**Misc.:** stretch and hydrate before moving into your main set

**Main Performance Block #1: 20 minutes (HR Zone 3)**

**3-minute seated- event tempo** with your cadence above 90 & within HR Z3 focus on deep belly breathing to ride as fast as possible without tripping above HR Z3. Hydrate and stretch as necessary to maintain optimum power output.

**2-Minute-Tall Gear-Out of the saddle interval**

Big chain ring up front, hardest gear in the back stand up & focus on keeping yourself from "bottoming out" at the bottom of the pedal stroke (pull back prior to hitting bottom dead center).

**REPEAT THIS 5 MINUTE BLOCK 4 TIMES FOR A TOTAL OF 20 MINUTES**

**Cool Down (HR Zone 1): Keep a close eye on your HR level for the final 5 minutes.**

**Duration:** 5 minutes

**Gearing:** the easiest combination that allows for 85-90 cadence & HR Z1

**Cadence:** 85-90

**Misc.:** don't dismount until your heart rate is within HR Z1

- **(Immediately following your above workout) Complete Racing Solutions Abdominal & Lower Back Work**

**Workout notes:** complete each of the following exercises for 30 seconds with perfect form; your rest interval is 30 seconds as you move to the next exercise. Go through each exercise and then repeat the entire set - total of 2 sets.

**Push Up-Knee to Shoulder:** [how to video](#)

**Abdominal Criss Cross:** [how to video](#)

**Abdominal Open Rotation:** [how to video](#)

**Ab Hip Risers:** [how to video](#)

- **2 Hour Nap After Mid-Day Meal**

**Miss. Notes:** research has validated that your pituitary gland releases the greatest amount of hGH which is responsible for important elements like rebuilding muscle tissue and how lean you are – the two key elements of your strength to weight ratios. To ensure that you fall asleep quickly and sleep as deep as possible, consume a lunch that contains high levels of high-quality protein & fat (they only thing that satisfies your appetite).

- **Evening Protocols – Contrast Therapy**

**Misc. Notes:** if logistically possible complete a few sessions of hot/cold water therapy to facilitate recovery:

**Cold (not freezing):** 10-minute soak (pool would be ideal – up to your neck)

**Warm (not too hot):** 10-minute soak (jacuzzi would be ideal – up to your neck)

**Repeat 2 to 3 times – Consume 10-12 ounces of ice-cold water immediately following.**

<b>Super Slow Challenge</b>		
<b>Warm Up</b>		
Concept 2 <sup>TM</sup> Row or Spin on Bike - 15 minutes Easy (no shorter)		
<b>CYCLE ONE</b>	<b>Date</b>	<b>Date</b>
<b>Single Leg Step onto Bench</b>		
Weight (Moderate)		
Reps – Right Leg (6-8 Reps: 4" count up and 4" count down)		
Weight (Same as Set #1)
