

Training Cycle: Phase 6
Cycle Duration: 6 Weeks
Work Week 5/6

Focus: Explosive Power and Sprint Speed

Intensity Note:

- Blue highlights indicate HR Zone 2 or less (Builds your aerobic engine burns fat as a primary fuel source)
- Red highlights indicate HR Zone 3+ (Builds your strength, speed & LT burns stored sugar as a primary fuel source)

Monday

- Body Analysis please use your Coach Robb Body Analysis Spreadsheet to log this information for evaluation purposes.
- Complete Rest Day

Misc. Notes: during each workout remember that each workout is designed to push you mentally and physically by 1% - no more or less. There will come a time during a race where you will have to dig deep – you will mentally dig into the well and remind yourself that you have put in the necessary time and effort to be as good as you can. Each workout is a building block towards that exact moment – read the purpose of each day's work out and recognize that you will tap into your experience of training at one time or another during your important races.

Mental Protocols: watch this video in a place where you have zero distractions for 4 minutes (the length of the video).

Psychology: concept video "Should I Train When I am Sick?" - video link

Tuesday

- Body Analysis please use your Coach Robb Body Analysis Spreadsheet to log this information for evaluation purposes.
- (Morning Workout) Complete Racing Solutions (CRS) MX: Speed Workout #1

[Please refer to the spreadsheet at the bottom of this document]

Workout Notes: during sets number one and two, focus on staying aerobic (don't go off your perceived exertion, but rather the hard number of your heart rate monitor). During all four sets, mentally focus on breathing deeply through your belly to deliver the highest levels of oxygen to your working muscles. During your top end sets, focus on optimized line selection verses bouncing off of the faces of everything.

Post Workout Protocols

• Flexibility: follow this trigger point routine to eliminate any muscle tightness and adhesions

Flexibility: isolate each muscle in your lower body hold each stretch for 8-10 seconds

- Nutrition: immediately consume Recovery Fuel to shorten your recovery window and replace depleted muscle sugar
- (If you didn't ride this morning afternoon workout) Complete Racing Solutions Combo Weight Workout Explosive Power
 [Please use the spreadsheet and associated videos listed at the bottom of this document]

Workout Notes: as the header implies, you want to be creating a tremendous amount of power during these lifts. All muscle groups will be hit both directly and indirectly throughout the workout, so you will feel quite fatigued by the end of the workout.

Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces of <u>Energy Fuel</u> to top off both your calories and provide you the much-needed electrolytes

Sets: 2

Rep Count: 6-8 reps (unless otherwise noted)

Speed of Lift: explosive off the bottom, slow back to starting point **Rest Interval:** none in between exercises; 1:00 in between cycles.

- Post Workout Protocols
 - Nutrition: consume a post recovery smoothie with two scoops of Energy Fuel to replace lost electrolytes
- Evening Protocols

Belly Breathing: take a straw and breathe through the straw – in and out; for 30 seconds; 90 seconds breathe without the straw – focus using the same muscles to inhale without the straw that you did with the straw. Repeat 5x

Mental Imagery: after implementing 10-15 deep belly breathes, visualize your next race – start to finish. See yourself implementing & maintaining perfect mechanics in every situation.

Wednesday

- Body Analysis please use your Coach Robb Body Analysis Spreadsheet to log this information for evaluation purposes.
- (Morning Workout) Complete Racing Solutions (CRS) MX: Aerobic Workout #1

[Please refer to the spreadsheet at the bottom of this document]

Workout Notes: if necessary, write down your lower and upper end heart rate numbers from **HR Z2** and post them on your crossbar pad to keep you mentally focused on your goal intensity. As outlined on your set notes, do not focus on lap times, just focus on your intensity – you should be aerobic the entire duration.

Post Workout Protocols

- Flexibility: follow this trigger point routine to eliminate any muscle tightness and adhesions
- Nutrition: immediately consume <u>Recovery Fuel</u> to shorten your recovery window and replace depleted muscle sugar
- (If you didn't ride this morning afternoon workout) Complete Racing Solutions Running Rower or Bike (MTB BMX Road Bike): Pacing Intervals (35')

Workout notes: the intensity is going to be high; however, the duration will be short. Focus on the rest interval – you want to allow for complete recovery for maximum results.

Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces of <u>Energy Fuel</u> to top off both your calories and provide electrolytes for proper muscle contraction.

Warm up (HR Zone 1):

Duration: 10 minutes **Misc.:** stretch and hydrate before moving into your main set

REPEAT THE FOLLOWING FOR 20 Minutes

2 Minutes at a Fast Pace (up to HR Z3 but not higher)

Get up to speed quickly and hold your intensity with optimized form to reduce the risk of injury.

3 Minute Recovery Block (complete recovery is imperative)

You should feel fresh and eager to start the next interval – if not, add more recovery time

Repeat 4x

Cool Down (HR Zone 1): Keep a close eye on your HR level for the final 5 minutes.

Duration: 5 minutes **Misc.:** stretch and hydrate before moving to your post workout protocols

Post Workout Protocols

- Flexibility: complete an entire stretch routine for your hips, hamstrings, quads, and calves
- Nutrition: immediately consume <u>Recovery Fuel</u> to shorten your recovery window and replace depleted muscle sugar (making tomorrows workouts more productive).
- Evening Protocols

Belly Breathing: take a straw and breathe through the straw – in and out; for 30 seconds; 90 seconds breathe without the straw – focus using the same muscles to inhale without the straw that you did with the straw. Repeat 5x

Mental Imagery: after implementing 10-15 deep belly breathes, visualize your next race – start to finish. See yourself implementing & maintaining perfect mechanics in every situation.

Thursday

- Body Analysis please use your Coach Robb Body Analysis Spreadsheet to log this information for evaluation purposes.
- (Morning Workout) Complete Racing Solutions (CRS) MX: Speed Workout #2

[Please refer to the spreadsheet at the bottom of this document]

Workout Notes: sets 3-5 will be designed to recover from a crash. The first set is a bit shorter, but still aerobic in nature. As mentioned last week, come into this workout realizing that you are going to be generating a high level of lactic acid and will be quite uncomfortable – mentally offset this with strong mental focus and clarity. Also, during your rest interval, consume 6-8 ounces of Energy Fuel to maintain your muscle and blood sugar levels along with your electrolytes for optimum muscle contraction. **Post Workout Protocols**

- **Flexibility:** follow this <u>trigger point routine</u> to eliminate any muscle tightness and adhesions
- Nutrition: immediately consume Recovery Fuel to shorten your recovery window and replace depleted muscle sugar
- (If you didn't ride this morning afternoon workout) Complete Racing Solutions Combo Weight Workout Explosive Power
 [Please use the spreadsheet and associated videos listed at the bottom of this document]

Workout Notes: as the header implies, you want to be creating a tremendous amount of power during these lifts. All muscle groups will be hit both directly and indirectly throughout the workout, so you will feel quite fatigued by the end of the workout.

Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces of Energy Fuel to top off both your calories and provide you the much-needed electrolytes

Sets: 2
Rep Count: 6-8 reps (unless otherwise noted)
Post Workout Protocols

Speed of Lift: explosive off the bottom, slow back to starting point **Rest Interval:** none in between exercises; 1:00 in between cycles.

- Flexibility: isolate each muscle in your lower body hold each stretch for 8-10 seconds
- Nutrition: consume a post recovery smoothie with two scoops of Energy Fuel to replace lost electrolytes
- Evening Protocols

Belly Breathing: take a straw and breathe through the straw – in and out; for 30 seconds; 90 seconds breathe without the straw – focus using the same muscles to inhale without the straw that you did with the straw. Repeat 5x

Mental Imagery: after implementing 10-15 deep belly breathes, visualize your next race – start to finish. See yourself implementing & maintaining perfect mechanics in every situation.

Shin Stripping: in addition to your foam roller & TP therapy (see last week); take your thumb and firmly press along the edge of your shin bone from your ankle up to your knee area. When you feel a knot or sticky spot, apply slightly more pressure, and hold for 5-10 seconds then slide further up the shin. Complete both sides of the shin bone for legs.

Friday

- Body Analysis please use your Coach Robb Body Analysis Spreadsheet to log this information for evaluation purposes.
- (Afternoon workout) Complete Racing Solutions Run Row- Bike (MTB-BMX-Road Bike): Even Tempo (40 Minutes)

Workout Notes: the key to this workout is making sure that you stay within HR Z2 (no higher); this will teach your body to spare sugar and burn stored body fat for energy (making you leaner and improving your VO2 Max).

Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces of <u>Energy Fuel</u> to top off both your calories and provide electrolytes for proper muscle contraction.

Warm Up: HR Zone 1 Duration: 10 minutes

Misc.: stretch and hydrate before moving into your main set

Main Performance Block: 25 minutes (HR Zone 2)

Set Notes: comfortable pace; stay relaxed and focused on good form to optimize both your efficiency and reduce your risk of injury.

Warm down: 5 Minutes (HR Zone 1)

Duration: 5 minutes (no shorter) **Misc. Notes:** stretch your lower back, calves, and quads after the cool down

Post Workout Protocols

- Flexibility: complete an entire stretch routine for your hips, hamstrings, quads and calves
- Nutrition: immediately consume Recovery Fuel to shorten your recovery window and replace depleted muscle sugar (making tomorrows workouts more productive).
- Evening Protocols

Belly Breathing: take a straw and breathe through the straw – in and out; for 30 seconds; 90 seconds breathe without the straw – focus using the same muscles to inhale without the straw that you did with the straw. Repeat 5x

Saturday

- Body Analysis please use your Coach Robb Body Analysis Spreadsheet to log this information for evaluation purposes.
- (Morning Workout) Complete Racing Solutions MX Speed Workout #1 Same as Tuesday internationally [Please refer to the spreadsheet at the bottom of this document]

Workout Notes: during sets number one and two, focus on staying aerobic (don't go off your perceived exertion, but rather the hard number of your heart rate monitor). During all four sets, mentally focus on breathing deeply through your belly to deliver the highest levels of oxygen to your working muscles. During your top end sets, focus on optimized line selection verses bouncing off of the faces of everything.

Post Workout Protocols

- Flexibility: complete dynamic movements, static stretches & foam rolling exercises for optimum recovery
- **Nutrition:** immediately consume 8-10 ounces smoothie with <u>high quality protein</u> to replace depleted muscle sugar and repair muscle tissue
- 2 Hour Nap After Mid-Day Meal

Miss. Notes: when you lay down, keep in mind that you are making yourself leaner, stronger and improving the strength of your immune system. Many athletes say that they want to be the best, but few will do what it really takes – like take a nap!

(If you didn't ride this morning – afternoon workout) Complete Racing Solutions Running – Rower or Bike (MTB – BMX – Road Bike): Pacing Intervals (35')

Workout notes: the intensity is going to be high; however, the duration will be short. Focus on the rest interval – you want to allow for complete recovery for maximum results.

Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces of <u>Energy Fuel</u> to top off both your calories and provide electrolytes for proper muscle contraction.

Warm up (HR Zone 1):

Duration: 10 minutes **Misc.:** stretch and hydrate before moving into your main set

REPEAT THE FOLLOWING FOR 20 Minutes

2 Minutes at a Fast Pace (up to HR Z3 but not higher)

Get up to speed quickly and hold your intensity with optimized form to reduce the risk of injury.

3 Minute Recovery Block (complete recovery is imperative)

You should feel fresh and eager to start the next interval – if not, add more recovery time

Repeat 4x

Cool Down (HR Zone 1): Keep a close eye on your HR level for the final 5 minutes.

Duration: 5 minutes **Misc.:** stretch and hydrate before moving to your post workout protocols

Post Workout Protocols

- Flexibility: complete an entire stretch routine for your hips, hamstrings, quads, and calves
- Nutrition: immediately consume Recovery Fuel to shorten your recovery window and replace depleted muscle sugar (making tomorrows workouts more productive).
- Evening Protocols

Belly Breathing: take a straw and breathe through the straw – in and out; for 30 seconds; 90 seconds breathe without the straw – focus using the same muscles to inhale without the straw that you did with the straw. Repeat 5x

Mental Imagery: after implementing 10-15 deep belly breathes, visualize your next race – start to finish. See yourself implementing & maintaining perfect mechanics in every situation.

Sunday

- Body Analysis please use your Coach Robb Body Analysis Spreadsheet to log this information for evaluation purposes.
- (Morning Workout) Complete Racing Solutions MX Aerobic Workout #1 Same as Wednesday internationally [Please refer to the spreadsheet at the bottom of this document]

Workout Notes: if necessary, write down your lower and upper end heart rate numbers from **HR Z2** and post them on your crossbar pad to keep you mentally focused on your goal intensity. As outlined on your set notes, do not focus on lap times, just focus on your intensity – you should be aerobic the entire duration. **Post Workout Protocols**

- Flexibility: complete dynamic movements, static stretches & foam rolling exercises for optimum recovery
- Nutrition: immediately consume 8-10 ounces smoothie with <u>high quality protein</u> to replace depleted muscle sugar and repair muscle tissue
- 2 Hour Nap After Mid-Day Meal

Misc. Notes: prior to your nap, consume a meal that is high in MCT's (medium chain triglycerides) – extra virgin olive oil, avocadoes, raw coconut, raw nuts and cold-water fish (salmon). This quality fat will be used to recharge your body from the inside out wile satisfying your appetite so that you can sleep soundly for 2-3 hours. When you wake up, consume 8-10 ounces of cold water and 2 scoops of Energy Fuel.

(If you didn't ride this morning - Afternoon workout) Complete Racing Solutions Run - Row- Bike (MTB-BMX-Road Bike):
 Even Tempo (40 Minutes)

Workout Notes: the key to this workout is making sure that you stay within HR Z2 (no higher); this will teach your body to spare sugar and burn stored body fat for energy (making you leaner and improving your VO2 Max).

Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces of <u>Energy Fuel</u> to top off both your calories and provide electrolytes for proper muscle contraction.

Warm Up: HR Zone 1 Duration: 10 minutes

Misc.: stretch and hydrate before moving into your main set

Main Performance Block: 25 minutes (HR Zone 2)

Set Notes: comfortable pace; stay relaxed and focused on good form to optimize both your efficiency and reduce your risk of injury.

Warm down: 5 Minutes (HR Zone 1)

Duration: 5 minutes (no shorter) **Misc. Notes:** stretch your lower back, calves, and quads after the cool down

Post Workout Protocols

- Flexibility: complete an entire stretch routine for your hips, hamstrings, quads and calves
- Nutrition: immediately consume <u>Recovery Fuel</u> to shorten your recovery window and replace depleted muscle sugar (making tomorrows workouts more productive).
- Evening Protocols

Belly Breathing: take a straw and breathe through the straw – in and out; for 30 seconds; 90 seconds breathe without the straw – focus using the same muscles to inhale without the straw that you did with the straw. Repeat 5x

Mental Imagery: after implementing 10-15 deep belly breathes, visualize your next race – start to finish. See yourself implementing & maintaining perfect mechanics in every situation.
